## Special Programs and Support

We have created benefits and special support programs that will provide comprehensive coverage for your family members who may have diabetes or a heart condition, as well as overall health and well-being. It combines features from both our Diabetes and Healthy Heart plans to provide enhanced coverage for both conditions.

- **Care Management Program:**
  - Work with a Care Manager to learn more about your condition and how to take care of yourself better, take your medications correctly, coordinate doctor visits and more.
  - Care Managers can be your single point of contact with CareSource to help you navigate and understand your health benefits.
- **Medication Management:**
  - Special expanded formulary provides zero-cost brand name and generic drugs for common treatments.
  - Support from pharmacists to help you manage medications and avoid potential drug interactions.

This comprehensive HDHP Preventive Plan gives you the best possible benefits for managing your health condition, as well as giving you the coverage you need to ensure you and your family stay healthy and well-supported.

\*Prior authorization or step therapy required for these medications, supplies and services.

## ADDITIONAL BENEFITS FOR ALL MEMBERS

### IMPORTANT REMINDER FOR HDHP HSA PLANS:

Your coverage includes a preventive drug benefit. This means that preventive drugs (medications to help prevent chronic conditions and illnesses) are covered outside of your plan's deductible.

These drugs can, at times be prescribed for treatment purposes. As a result, the listing of a drug does not mean that it will be covered by your benefit plan before your HDHP deductible is satisfied. If your doctor has prescribed a listed drug for treatment purposes (and not preventive purposes) then your plan does not provide coverage for that drug before your HDHP deductible is satisfied. Please be reminded that Health Savings Accounts (HSAs) have tax and legal ramifications. CareSource cannot guarantee or provide any legal advice on the way these products are prescribed for preventive purposes or that the IRS would agree that all satisfy the definition under §223 NOTICE 2019-45.

As everyone's medical circumstances are different, and because proper classification is necessary for you to ensure you are complying with applicable HDHP tax regulations, it is important for you to confirm the purpose of the prescription with your doctor. Please call the number on your member ID card when your doctor confirms for you that they prescribed one of the listed drugs for treatment purposes so your claims can be processed correctly. Unless you provide us with this information, claims for the drugs listed in the will be processed as "preventive," and you or your doctor may be asked by us to provide medical records showing that the drug you're taking is being used for prevention. Remember, if you improperly classify the drug, it may result in adverse tax consequences so please be sure to take the confirming step to properly classify your claim.

Please follow these steps to make sure you are properly classifying the purpose of your prescription:

1. Find your drug on the list.
2. Talk to your doctor about whether your drug is in fact being prescribed for preventive purposes (and not treatment purposes).
3. If prescribed for treatment purposes, call the number on your member ID card to let us know.
4. If prescribed for preventive purposes, there is no need to call.
