Re: Service Plan Enhancements

Effective 4/20/2017 service plan items with the same service code, modifier, and date range have been combined on the service plan. The greatest impact is on service codes with 15 minute increments. The units have been combined to allow for continued claims submission. The total of all service plan items are still available, however this may not be reflected in the service narrative noted on the Provider Portal. CareSource is working on resolution for the service narrative issue.

Thank you for your patience.
