

2027 GA Marketplace
Prior Authorization List

2027 Georgia Marketplace CareSource Prior Authorization List

CareSource®

Some health care services require your provider to get approval from CareSource before you can get the service. This is called prior authorization. We do this to make sure the care you get is appropriate and necessary. Your provider must get prior authorization for you to receive the services listed below. Emergency care does not need prior authorization.

CareSource works with certain doctors and providers to get you care. We call these in-network providers. To have your health care services covered by CareSource, you must go to an in-network provider. If your provider is not part of the CareSource network, you or the provider must get prior authorization or approval before you get any service, not just the ones listed below. If you don't do this, you may not get reimbursed. Exceptions include emergency services.

Services must meet the terms and conditions of your plan including, but not limited to, eligibility, medical necessity, coverage restrictions, and benefit limitations.

The list is subject to change due to coverage, new codes, and state requirements. For the most up-to-date information, please use the CareSource [Procedure Lookup Tool](#).

2027 GA Marketplace
Prior Authorization List

Pharmacy Services

Some covered prescription drugs require prior authorization. Prior authorization helps promote appropriate and safe utilization and enforcement of guidelines for Prescription Drug Benefit coverage. Covered drugs are found on the Prescription Drug Formulary and in the “Price A Medication” online search tool. If a covered prescription drug requires review prior to coverage, you will see one or more of the following abbreviations:

- PA (indicating a clinical prior authorization is required for the drug)
- QL (indicating a quantity or dose limit for the drug)
- ST (indicating a step therapy requirement for the drug)

Prescription drugs that are not on the Prescription Drug Formulary are called Non-Formulary drugs. Non-formulary drugs always require a formulary exception review and approval to be covered by CareSource. You, your authorized representative, or your prescribing physician may request a formulary exception review to determine if the Non-Formulary drug is clinically appropriate.

You can find both the Prescription Drug Formulary and the Price A Medication online search tool at this link: <https://www.caresource.com/plans/marketplace/benefits-services/pharmacy/preferred-drug-list/>.
