

Electronic Visit Verification Requirements

for HAP CareSource™ MI Coordinated Health (HMO D-SNP)

The 21st Century Cures Act mandates that states implement Electronic Visit Verification (EVV) for all Medicaid personal care services (PCS) and home health care services (HHCS) that require an in-home visit by a provider. The Michigan Department of Health and Human Services (MDHHS) has partnered with HHAeXchange (HHAX) to support EVV. This system is used to validate in-home visits for Medicaid recipients.

The following codes are subject to EVV validation requirements as outlined on the MDHHS [website](#).
