Fuel Up With *Fresh Food*

Start strong this spring by adding fresh fruits and vegetables to your diet. Eating fresh food helps you stay healthy. It also gives you energy. That way you can get outside and enjoy the weather as it gets warmer.

Fruits and vegetables are great sources of vitamins and minerals. They also help decrease the risk of chronic disease. Here you can see which fruits and vegetables have the vitamins and minerals you need.

Nutrients	Importance	Fruits & Vegetables
Vitamin A	Helps with healthy eyes and skin, protects from infection	Cabbage, cantaloupe, carrots, grapefruit, leaf and romaine lettuce, sweet potatoes, watermelon, tomatoes
Vitamin C	Supports immune health, helps heal cuts and wounds	Broccoli, cabbage, cantaloupe, cauliflower, grapefruit, oranges, pineapple, strawberries, tomatoes
Calcium	Helps keep teeth and bones healthy	Blackberries, leafy green vegetables – collard greens, kale, oranges, spinach

It may seem like a challenge to know where to start. Small changes can make a big difference. You can add fresh food to meals you are already eating. Add carrots or spinach to pasta sauces or soups. You can also add fruit to salads or side dishes. Fruits like bananas, apples, and oranges are easy to grab on the go. Take Control of Your Cluttered Mind

Studies show having a tidy home can bring calm to your life. Cleaning and decluttering your home can have a positive effect on your mental health. It can give you a feeling of control in your life. If you have let your home go because you have been busy or feeling down, it can feel overwhelming to get started.

Experts say to start in one room or with one task. Washing the dishes is a great place to start. Dirty dishes are an easy task, and one that is easy to measure progress. Then wipe the counters. Pretty soon, the kitchen is clean! Any room you start is a great place. Getting started is the key.

It is amazing how much better having a clean room or a clean home can feel. To get more information about decluttering and health essentials, you can read or listen to podcasts from the Cleveland Clinic at www.my.clevelandclinic.org/podcasts/health-essentials.

Prepping for Spring Storms

Spring storms can make getting around hard. Get ready for bad weather before it hits. Make kits for your home and car in case you get caught by a storm or stuck in traffic. If you or a family member is out when a storm hits, have a plan for where you go if you cannot get home.

YOUR HOME KIT:

Have candles, matches, blankets, and enough water to last at least three days for each person on hand. If you can store them safely, a kerosene heater or generator can be helpful if the power will be out for a long time. If you have a fireplace, bring in enough wood to burn for a few days.

YOUR CAR KIT:

Have blankets, a raincoat, socks, bottled water, packaged snacks, jumper cables, sand, and a flashlight on hand.

You can get more tips and ideas to prepare for all types of weather at www.Ready.gov.

Don't Let Illness Bring You Down

Stress and Self-Care for Parents and Caregivers

Parents and caregivers have needs just like children. Self-care is not selfish. You cannot give your best to others if you do not care for yourself first.

The first step in caring for yourself is knowing when you are stressed. Stress can make you feel physically tense or stiff. It can also make you mentally tired or unable to fall asleep at night. Some people even get sick more often because their immune system is not working as well as it should.

Taking time to relax is vital to lower stress. Whether it is listening to music, taking a warm bath, or meditating, you need to make time for yourself. Reframing your thinking can also help lower stress. If you have thoughts like, “I am such a bad parent or caregiver” or “I can’t do this”, you can start believing those statements even if they are not true. Try to catch these thoughts and replace them with coping statements. Think to yourself, “this too shall pass” or “I can do this” to help you cope in stressful moments.

All of this is *easier said than done* as a parent or caregiver. But you need to take care of yourself. Not only will it make you a better caregiver or parent, it is also good for your health.

Staying Healthy in 2023, and Beyond!

Ambulatory Surgery Centers

Having some common outpatient procedures and tests like colonoscopies, mammograms, x-rays, and ultrasounds done at outpatient diagnostic centers or ambulatory surgery centers (ASCs) are easy and safe.

Compared to a large hospital, these centers are usually closer to home and easier to find your way around. You can normally get in and out the same day. They also cost less for the same procedures or tests. You may be able to save 60% or more by using an ASC for a test or procedure over having it done at the hospital.

Talk to your provider about using these centers when you need a diagnostic test or procedure.

Need A Ride?

A big part of staying healthy is going to all your health care visits. As a CareSource member, you get transportation to and from your providers and other health care visits at no cost to you.

We Also Help You Go To:

Health care visits

The pharmacy to pick up your prescriptions

Renewal appointments with the State at Job and Family Services

The gym
