</table>
| Well-Child Visits in the First 15 Months of Life* | Addresses the adequacy of well-child care for infants. Measures the percentage of children who had between one and six or more well-child visits by age 15 months | Documentation of a visit to a PCP, the date of the visit and all of the following:  
- A health history  
- A development history (physical and mental)  
- A physical exam  
- Health education/anticipatory guidance  
- Services specific to the assessment or treatment of an acute or chronic condition do not count toward this measure | ICD-10: Z00.XXX, Z02.XXX  
Well Care CPT: 99381, 99382, 99391, 99392, 99461  
HCPCS: G0438, G0439 |
| Well-Child Visits in the Third, Fourth, Fifth and Sixth Years of Life* | Addresses the use of routine check-ups for children ages 3, 4, 5 and 6 years of age. Measures the percentage of children in the above age range who received at least one well-child visit with a primary care provider (PCP) during the measurement year | One visit annually providing documentation of:  
- Assessment or counseling or education on risk behaviors and preventive actions associated with sexual activity  
- Depression  
- The risks of tobacco usage  
- The risks of substance use (including alcohol) | ICD-10: Z00.XXX, Z02.XX,  
Well Care CPT: 99382, 99383, 99392, 99393  
HCPCS: G0438, G0439 |
| Adolescent Well-Care Visits | The percentage of members 12 to 21 years of age who had at least one comprehensive well-care visit with a PCP or an OB/GYN during the measurement year | | ICD-10: Z00.XXX, Z02.XX,  
Well Care CPT: 99384, 99385, 99394, 99395  
HCPCS: G0438, G0439 |

*All of the above well-child visits must include documentation of the following elements: (1) physical exam, (2) health and developmental history (physical and mental) and (3) health education/anticipatory guidance.*

### Effectiveness of Care: Overuse/Appropriateness

<table>
<thead>

<tbody>
<tr>
<td>Appropriate Treatment for Children With Upper Respiratory Infection</td>
<td>The percentage of children 3 months to 18 years of age who were given a diagnosis of upper respiratory infection (URI) and were not dispensed an antibiotic prescription.</td>
<td>The common cold is a frequent reason for children visiting the doctor’s office. Pediatric clinical practice guidelines do not recommend antibiotics for a majority of upper respiratory tract infections because of the viral etiology of these infections, including the common cold. This measure is reported as an inverted rate. A higher rate indicates appropriate treatment of children with URI (i.e., the proportion for whom antibiotics were not prescribed).</td>
</tr>
</tbody>
</table>

This measure includes patients who have only one diagnosis for the office visit.

The upper respiratory diagnoses are ICD-10: J00, J06.0, J06.9

Compliance occurs only if patient is not prescribed an antibiotic medication.
