

2020 HEDIS® QUALITY COMPANION GUIDE

CareSource recognizes the outstanding work you are doing every day to improve your patients' health and quality outcomes.

CareSource has created this **2020 HEDIS® Quality Companion Guide** to share the benefits of including CPT® Category II codes with your claim submissions. Category II codes enable you to share preventative care and diagnostic test results, which allow for better understanding of population health.

Services identified in some measures may not be relevant to patients with certain medical histories. Submission of appropriate ICD-10 codes will exclude those individuals from the measures. These exclusions will allow CareSource to provide cleaner reporting, helping you clearly identify the patients who need care.

Additional Benefits

- **Enhanced Reporting** - Identifying and closing gaps in care is easier with reporting that reflects complete patient care, and includes information that tracks performance measures.
- **Fewer Medical Record Requests** - Including CPT® II codes can substantially reduce the number of patient charts requiring review, thereby minimizing your administrative burden to confirm care you have completed.
- **Improved Quality Outcome Tracking** - Gaining deeper understanding of your patient population can support your own Quality Improvement initiatives.
- **Exclusions** - due to medical history helps improve care by allowing you to focus efforts on cancer screenings and disease-specific treatment, and manage patients most likely to benefit from that care.

Coding for Outcome Measures

Each CPT® Category II code correlates to a test value or measurement. For outcome measures like blood pressure readings and HbA1c values, add the CPT® II code that corresponds to the result. Refer to chart below for detailed information.

Quality Measures with CPT® Category II Codes

Include CPT® II codes when completing services that help meet the following measures:

- Care of Older Adults
- Controlling High Blood Pressure
- Diabetes - HbA1c control
- Diabetes - Retinal Exam
- Diabetes - Kidney Disease Monitoring
- Diabetes – Blood Pressure Control
- Medication Reconciliation Post-Discharge
- Prenatal and Postpartum Care
- Cardiovascular Monitoring for People with Cardiovascular Disease and Schizophrenia
- Diabetes Monitoring for People with Diabetes and Schizophrenia
- Diabetes Screening for People with Schizophrenia or Bipolar Disorder who are Using Antipsychotic Medications
- Metabolic Monitoring for Children and Adolescents on Antipsychotics

CPT® Category II Codes and Descriptions

The chart below defines the CPT®II codes associated with the identified measures. Submitting claims using these codes helps improve performance reporting of quality-based care linked to Stars and HEDIS metrics, and are not generally reimbursable. See CareSource Adult HEDIS and Behavioral Health HEDIS Coding Guides for a complete list of CPT®/HCPCS/ICD-10 codes.
