

# NETWORK Notification

**Notice Date:** January 9, 2026  
**To:** All Marketplace Network Providers  
**From:** CareSource  
**Subject:** Consultation Code Billing

---

## Summary

As a reminder, CareSource Marketplace plans align with Medicare reimbursement methodology for consultation codes. Medicare does not reimburse separately for Status 'I' indicator codes, including consultation codes CPT 99242 through 99255. Providers should use the appropriate evaluation and management (E/M) codes for patient visits.

## Impact

The discontinuation of consultation codes requires providers to adapt to the use of E/M codes that reflect the complexity of services provided. Medicare's decision not to reimburse consultation codes necessitates that consultation services be billed using the most appropriate (non-consultation) E/M code for the service rendered.

Please note that while this notification provides guidance on the transition to evaluation and management (E/M) codes, it does not constitute billing instructions. Providers are ultimately responsible for determining the appropriate codes based on their professional judgment and individual payer guidelines.

**Please ensure that the E/M code billed adheres to the established medical coding practices and is adequately supported by the corresponding medical records.**

## Questions

For questions, please contact the CareSource Provider Call Center at **1-833-230-2101**, Monday through Friday, 8 a.m. to 6 p.m. Eastern Time (ET)/7 a.m. to 5 p.m. Central Time (CT).
