

Network Notification

Notice Date: January 28, 2020
To: Indiana Marketplace Providers
From: CareSource
Subject: Clarification for Opioid Treatment Program Rates

Summary

CareSource Indiana would like to clarify Opioid Treatment Program coverage for Indiana Marketplace members. Effective Jan. 1, 2020, Medicare is paying Medicare-enrolled Opioid Treatment Programs (OTP) to deliver opioid use disorder (OUD) treatment services to Medicare members.

Impact

The Medicare coverage has no impact on current reimbursement for Indiana Marketplace plans. Marketplace coverage does not offer reimbursement for coverage of Opioid Analgesic and Controlled Substances unless prescribed for pain management and with prior authorization.

Importance

As described in the evidence of coverage for Marketplace, Covered Persons prescribed Opioid Analgesics for Acute and/or Chronic Pain may be subject to other utilization review measures as determined by us. Prior Authorization and other review measures for Controlled Substances, including Opioid Analgesics (treatment for substance use disorders), will be administered to comply with state and federal regulations.
