

## CareSource Hoosier Healthwise Plan C

09/01/2017

### INTRODUCTION

\* Por favor, consulte las páginas 5-8, para ver la versión en español.

We are pleased to offer the 2017 **CareSource Medicaid Formulary** as a guide to help you. This list can help medical providers in picking clinically-appropriate and lower priced products for their patients. All Indiana Medicaid drugs are covered by CareSource. But this is a list of preferred drugs.

The drugs listed have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee. The list is then approved by a local Pharmacy and Therapeutics (P&T) Committee for inclusion. The list reflects up-to-date medical practice at the time of review.

The data in this list and its appendices is supplied to assist medical providers. We do not warrant or assure accuracy of the data. It is also not meant to be complete in nature. This list is not meant to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the data in the list is provided as a guide for drug therapy choice. Specific drug choice for a unique patient rests fully with the prescriber.

The list is subject to state-specific laws and rules. This can include, but is not limited to, those about generic substitution, controlled substance schedules, preference for brands and mandatory generics when it applies.

We take no responsibility for the actions or gaps of any medical provider based on trust, in whole or in part, on the data contained in this list. The medical provider should review the drug maker's product information or standard references for details.

National standards can be found on the National Guideline Clearinghouse site at <http://www.guideline.gov>, on the websites listed under each therapeutic class and on the sites listed in the WEBSITES section of this list.

### PREFACE

The list is set up in sections. Each section is split up by therapeutic drug class primarily defined by mechanism of action. Products are listed by generic name if available with brand name listed for information only. Unless the cited drug can be taken as an injection or a special case is noted, usually, all dosage forms and strengths of the drug cited are part of the list.

### PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of an independent National Pharmacy and Therapeutics (P&T) Committee are used to approve safe and clinically effective drug therapies. The P&T Committee is an outside panel of experts from across the United States. The P&T Committee's voters include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background

and knowledge of prescription drugs. Voting members of the P&T Committee must make known any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

In addition to the National P&T Committee review, the CareSource Pharmacy and Therapeutics (P&T) Committee makes formulary recommendations based on the needs of members in your area. The CareSource P&T Committee is made up of the Plan's Medical Directors, Pharmacy staff and those in the medical community.

## DRUG LIST PRODUCT DESCRIPTIONS

To help you know which exact strengths and dosage forms on the list are covered, examples are below. The basic ideas shown in the examples can often count for other entries in the list. Any exceptions are noted.

**Listed products generally include all strengths and dosage forms of the cited brand-name product.**

Pregabalin Lyrica

Oral capsules, oral solution and all strengths of Lyrica would be part of this listing.

**When a strength, dosage or different formulation is noted, only that specific strength, dosage or formulation may be covered. Other strengths/dosage/formulations, which includes injectable dosage forms of the listed product, are not covered.**

Colestipol tabs Colestid

The generic-name oral tablet formulation is on the list. From this entry, the oral packets and granules cannot be assumed to be on the list unless there is a unique entry.

**Extended-release and delayed-release products have a separate entry.**

Metformin Glucophage

The immediate-release product listing of Glucophage alone would not include the extended-release product Glucophage XR.

Metformin ext-rel Glucophage XR

A separate entry for Glucophage XR confirms that the extended-release product is on the list.

Dosage forms on the list will be consistent with the category and use where listed.

Neomycin/polymyxin B/hydrocortisone Cortisporin

Since Cortisporin is listed only in the OTIC section, it is limited to the otic solution and suspension. From this entry you cannot assume the topical cream is on the list unless there is an entry for this product in the DERMATOLOGY section of the list.

## GENERIC SUBSTITUTION

Generic substitution is a pharmacy action in which a generic version is dispensed rather than a prescribed brand-name product. **Boldface type** means a generic is available. But, not all strengths or dosage forms of the generic name in boldface type may be generically on hand. In most cases, a brand-name drug for which a generic product becomes available will become non-formulary. The generic product will be covered in the brand-name drug's place, when it is

released into the market. But, the list is subject to state-specific regulations and rules about generic substitution and mandatory generic rules apply where needed.

Generic drugs are often priced lower than their brand-name equivalents and should be prescribed first, as long as the standards are followed. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are made under the same strict standards as brand-name drugs.
- Tested in humans to make sure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may differ from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Made in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to have the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

## PLAN DESIGN

The list shows a closed formulary plan design. The medications listed are covered by the plan as represented. Certain medications on the list are covered if utilization management standards are met (i.e. Step Therapy, Prior Authorization, Quantity Limits, etc.). Requests for use of such medications outside of their listed standards will be reviewed for medical need. If a medication is not listed, a formulary exception may be requested for coverage. Medical need or formulary exception requests will be reviewed based on drug-specific prior authorization measures or standard non-formulary prescription request criteria.

## HOOSIER HEALTHWISE PLAN C

Hoosier Healthwise is a health care program for pregnant women and children. The program covers medical care like doctor visits, prescription medicine, mental health care, dental care, hospitalizations, surgeries, and family planning at little or no cost to the member or the member's family.

Package C, or Children's Health Insurance Program (CHIP) is a full-service plan for children up to age 19. There is a small monthly premium payment and co-pay for some services based on family income. Most children will fall into the Hoosier Healthwise Program. You may qualify for one of two benefit packages based on income. Please follow this link to see CHIP Program Options by visiting: <http://member.indianamedicaid.com/am-i-eligible/eligibility-guide.aspx>

## LEGEND

**AL** Age Limit

**OTC** Over the counter

**PA** Prior Authorization; Prior Authorization includes but is not limited to therapeutic interchange

**QL** Quantity Limit

**SP** Specialty Drug

**ST** Step Therapy

<b>boldface</b>	Indicates generic availability; boldface may not apply to every strength or dosage form under the listed generic name
delayed-rel	Delayed-release (also known as enteric-coated), refer to the reference brand listed for clarification
ext-rel	Extended-release (also known as sustained-release), refer to the reference brand listed for clarification

**Please be advised that this document is updated periodically and changes may appear prior to their effective date to allow for client notification.**

## INTRODUCCIÓN

Nos complace ofrecerle el **formulario de Medicaid 2017 de CareSource** como una guía para ayudarlo. Esta lista puede ayudar a los proveedores de servicios médicos en la selección de productos clínicamente adecuados y de menor precio para sus pacientes. Todos los medicamentos de Medicaid de Indiana están cubiertos por CareSource. No obstante, esta es una lista de medicamentos preferidos.

Los medicamentos que se representan fueron revisados por un Comité nacional de farmacia y terapéutica (Pharmacy and Therapeutics, P&T). Posteriormente, un Comité local de farmacia, terapéutica y tecnología (Pharmacy, Therapeutics and Technology, PT&T) aprueba la lista para su inclusión. La lista refleja la práctica médica actualizada al momento de la revisión.

La información en esta lista y sus anexos se suministra para ayudar a los proveedores de servicios médicos. No garantizamos ni aseguramos la exactitud de la información. Tampoco pretende ser de naturaleza exhaustiva. Esta lista no pretende ser un sustituto para los conocimientos, la experiencia, la habilidad y el criterio del proveedor médico en su elección de medicamentos de venta con receta. Todos los datos de la lista se proporcionan como una guía para la elección de terapia de medicamentos. La elección de un medicamento específico para un paciente es decisión exclusiva de la persona que receta.

La lista está sujeta a las leyes y normas específicas en cada estado. Esto puede incluir, pero no se limita a, las referidas a sustitución por medicamento genérico, programas de sustancias controladas, preferencias de marcas y medicamentos genéricos obligatorios cuando corresponde.

No nos hacemos responsables por las acciones o la omisión de ningún proveedor médico basadas en la confianza, en su totalidad o en parte, en la información contenida en esta lista. El proveedor médico debe revisar la información sobre los productos del fabricante de medicamentos o referencias estándar para conocer más detalles.

Los estándares nacionales se pueden encontrar en el sitio de la Cámara Nacional de Compensación de Pautas (National Guideline Clearinghouse) en <http://www.guideline.gov>, en los sitios web que figuran bajo cada clase terapéutica y en los sitios que figuran en la sección SITIOS WEB de la lista.

## PREFACIO

La lista está ordenada por secciones. Cada sección se divide de acuerdo con la clase terapéutica que se define principalmente por el mecanismo de acción. Los productos se enumeran por nombre que no es de marca con el nombre de la marca solo con fines informativos. A menos que el citado medicamento pueda administrarse como una inyección o se especifique un caso especial, por lo general, todas las formas de dosificación y las concentraciones correspondientes del medicamento mencionado forman parte de la lista.

## COMITÉ DE FARMACIA y TERAPÉUTICA (P&T)

Los servicios de un Comité nacional de farmacia y terapéutica (P&T) independiente se usan para aprobar las terapias con medicamentos seguros y clínicamente efectivos. El Comité de P&T es un panel de expertos externos de todos los Estados Unidos. Los votantes de la Comisión de P&T incluyen médicos, farmacéuticos, un farmacoeconomista y un especialista en ética médica, los cuales tienen antecedentes y conocimientos amplios de los medicamentos de venta con receta. Se invita a los empleados con experiencia clínica significativa a reunirse con el Comité de P&T, pero ningún empleado puede votar sobre los temas antes que el Comité de P&T. Los miembros

del Comité de P&T que votan deben dar a conocer cualquier relación financiera o conflicto de intereses con los fabricantes farmacéuticos.

Además de la revisión del Comité nacional de P&T, el Comité de farmacia, terapéutica y tecnología (PT&T) de CareSource hace recomendaciones de formulario de acuerdo con las necesidades de los afiliados en su área. El Comité de PT&T de CareSource está integrado por los directores del plan médico, personal de farmacia y quienes pertenecen a la comunidad médica.

## DESCRIPCIONES DE PRODUCTOS DE LA LISTA DE MEDICAMENTOS

A continuación encontrará ejemplos para ayudarlo a saber qué concentraciones exactas y formas de dosificación de la lista están cubiertas. Las ideas básicas que se muestran en los ejemplos con frecuencia pueden servir para otros puntos de la lista. Se informa sobre cualquier excepción.

**Por lo general, los productos que figuran en la lista incluyen todas las concentraciones y las formas de dosificación del producto de marca citado.**

Pregabalina

Lyrica

Las cápsulas orales, la solución oral y todas las concentraciones de Lyrica formarían parte de esta lista.

**Cuando se especifica una concentración, dosis o formulación diferente, puede estar cubierta únicamente esa concentración, dosis o formulación específica. Otras concentraciones/dosis/formulaciones, lo que incluye las formas de dosificación inyectables del producto de la lista, no están cubiertas.**

Colestipol en comprimidos

Colestid

La formulación de comprimidos orales de nombre genérico se encuentra en la lista. A partir de esta entrada, no se puede dar por sentado que los paquetes orales y gránulos están en la lista a menos que exista una entrada específica.

**Los productos de liberación prolongada y liberación retardada necesitan su propia entrada.**

Metformina

Glucophage

El hecho de que el producto de liberación inmediata de Glucophage figure en la lista por sí solo no incluirá los productos de liberación prolongada Glucophage XR.

Metformina ext-rel

Glucophage XR

Una entrada aparte para Glucophage XR confirma que el producto de liberación prolongada está en la lista.

Las formas de dosificación de la lista son consistentes con la categoría y el uso cuando se indican.

Neomicina/polimixina B, hidrocortisona

Cortisporin

Dado que Cortisporin figura solo en la sección ÓTICA, se limita a la solución ótica y a la suspensión. A partir de esta entrada no se puede dar por sentado que la crema tópica está en la

lista a menos que exista una entrada de este producto en la sección de DERMATOLOGÍA de la lista.

## SUSTITUCIÓN POR GENÉRICO

La sustitución por medicamento genérico es una acción de la farmacia en la que se dispensa una versión genérica en lugar de un producto de marca recetado. Lo que figura en negrita se refiere a la disponibilidad de genéricos. Sin embargo, no todas las concentraciones o las formas de dosificación del nombre genérico en **negritas** pueden encontrarse como medicamentos genéricos. En la mayoría de los casos, un medicamento de marca para el cual hay disponible un producto genérico no pertenecerá al formulario. Se cubrirán los productos genéricos en lugar del medicamento de marca cuando se lancen al mercado. Sin embargo, la lista está sujeta a los reglamentos estatales específicos y se aplican reglas sobre la sustitución por medicamentos genéricos y medicamentos genéricos obligatorios cuando es necesario.

Los medicamentos genéricos a menudo tienen un precio más bajo que sus equivalentes de marca y deben ser recetados en primer lugar, siempre y cuando se cumplan los estándares. Los medicamentos genéricos de venta con receta están:

- Aprobados por la Administración de Alimentos y Medicamentos de los EE. UU. en cuanto a la seguridad y efectividad, y se fabrican bajo las mismas normas estrictas que los medicamentos de marca.
- Probados en humanos, para asegurar que el medicamento genérico se absorbe en el torrente sanguíneo en una tasa y un grado similar en comparación con el medicamento de marca (bioequivalencia). Los medicamentos genéricos pueden diferir de los medicamentos de marca en el tamaño, el color y los ingredientes inactivos, pero esto no altera la efectividad ni la capacidad de que se absorban igual que el medicamento de marca.
- Fabricados con la misma concentración y la misma forma de dosificación que los medicamentos de marca.

Cuando un medicamento genérico sustituye a un medicamento de marca, puede esperar que el genérico tenga el mismo perfil de seguridad y efecto clínico que el medicamento de marca (equivalencia terapéutica).

## DISEÑO DEL PLAN

La lista muestra un diseño de plan de formulario cerrado. Los medicamentos de la lista están cubiertos por el plan tal y como aparecen. Determinados medicamentos en la lista están cubiertos si se cumplen los estándares de gestión de uso (por ej., terapia escalonada, autorización previa, límites de cantidad, etc.). Se revisarán las solicitudes para el uso de estos medicamentos fuera de los estándares de la lista en caso de necesidad médica. Si un medicamento no está en la lista, puede solicitar una excepción al formulario para la cobertura. Las solicitudes de excepción al formulario o por necesidad médica se revisarán de acuerdo con las medidas de la autorización previa de medicamentos específicos o criterios estándar de solicitud de prescripción que no pertenezcan al formulario.

## HOOSIER HEALTHWISE PLAN C

Hoosier Healthwise es un programa de atención médica para mujeres embarazadas y niños. El programa cubre atención médica, como consultas a médicos, medicamentos de venta con receta, atención de salud mental, atención odontológica,

internaciones, cirugías y planificación familiar a un costo bajo o sin costo para el afiliado o el familiar del afiliado.

El Paquete C, o el Programa de Seguro de Salud para Niños (Children's Health Insurance Program, CHIP) es un plan de servicio completo para niños hasta los 19 años. Hay un pago de prima mensual y copado reducido para algunos servicios de acuerdo con los ingresos familiares. La mayoría de los niños entra en el programa Hoosier Healthwise. Es posible que califique para uno o dos paquetes de beneficios de acuerdo con sus ingresos. Siga este vínculo para ver opciones del programa CHIP visitando: <http://member.indianamedicaid.com/am-i-eligible/eligibility-guide.aspx>

## LEYENDA

**AL** Límite de edad

**OTC** De venta libre

**PA** Autorización previa; Autorización previa incluye, pero no se limita, al intercambio terapéutico

**QL** Límite de cantidad

**SP** Medicamentos de especialidad

**ST** Terapia escalonada

**negrita** Indica la disponibilidad de genéricos; es posible que la negrita no se aplique a cada concentración o forma de dosificación bajo el nombre genérico de la lista

**delayed-rel** liberación retardada (también conocido como tableta con recubrimiento entérico), consulte la marca de referencia que figura como aclaración

**ext-rel** liberación prolongada (también conocida como liberación sostenida), consulte la marca de referencia que figura como aclaración

## AVISO

La información incluida en esta lista es de propiedad. La información no puede copiarse en su totalidad o en parte sin permiso por escrito. ©2015. Todos los derechos reservados.

Esta lista hace referencia a medicamentos con receta de marca que son marcas registradas de fabricantes farmacéuticos.

CareSource no opera los sitios web u organizaciones que figuran aquí, ni es responsable de la disponibilidad o confiabilidad del contenido de los sitios web. Estos avisos no implican ni constituyen una adhesión, patrocinio ni recomendación por parte de CareSource.

**Se le advierte que este documento se actualiza periódicamente y pueden aparecer cambios antes de su fecha de entrada en vigencia para permitir que se notifique al cliente.**

## OVER-THE-COUNTER DRUG LIST

The **Over-The-Counter Drug List** is a guide to non-prescription medications that are covered by your plan. This list can help your doctor choose the medicines that are right for you. If an over-the-counter medicine that you use is not on this list, it may still be covered if your doctor asks for you to get it. Over-the-counter drug coverage requires a valid prescription.

**This list is not an all-inclusive list and does not guarantee coverage.** Please visit [www.caresource.com](http://www.caresource.com) for a complete list.

PRODUCT NAME	BRAND NAME EXAMPLES	REQUIREMENTS/LIMITS

## ANTILIPEMICS

The 2013 ACC/AHA Guideline on the Treatment of Blood Cholesterol to Reduce Atherosclerotic Cardiovascular Risk in Adults is available at:

<http://circ.ahajournals.org/content/early/2013/11/11/01.cir.0000437738.63853.7a>

### Bile Acid Resins

	<b>cholestyramine</b>	QUESTRAN/QUESTRAN LIGHT
	<b>colestipol tabs</b>	COLESTID

### Cholesterol Absorption Inhibitors

<b>ST, QL</b>	<b>ezetimibe</b>	ZETIA
---------------	------------------	-------

**QL** ezetimibe = Max 30 tabs per month

### Fibrates

	<b>fenofibrate</b>	LOFIBRA
	<b>fenofibrate</b>	TRICOR
	<b>gemfibrozil</b>	LOPID

### HMG-CoA Reductase Inhibitors

	<b>atorvastatin</b>	LIPITOR
	<b>lovastatin</b>	MEVACOR
	<b>pravastatin</b>	PRAVACHOL
	<b>rosuvastatin</b>	CRESTOR
	<b>simvastatin</b>	ZOCOR

### Omega-3 Fatty Acids

	<b>omega-3 acid ethyl esters</b>	LOVAZA
--	----------------------------------	--------

### Miscellaneous

<b>PA, SP</b>	lomitapide	JUXTAPID
<b>PA, SP</b>	mipomersen	KYNAMRO

## BETA-BLOCKERS

Guidelines for the use of beta-blockers and beta-blocker combinations in various patient populations are available at:

<http://jama.jamanetwork.com/article.aspx?articleid=1791497>

<http://www.acc.org>

	<b>acebutolol</b>	
	<b>atenolol</b>	TENORMIN
	<b>betaxolol</b>	
	<b>bisoprolol</b>	ZEBETA
	<b>carvedilol</b>	COREG
	<b>labetalol</b>	TRANDATE

	<b>metoprolol tartrate 25 mg, 50 mg, 100 mg</b>	LOPRESSOR
	<b>nadolol</b>	CORGARD
	<b>pindolol</b>	
	<b>propranolol</b>	
	<b>propranolol ext-rel</b>	INDERAL LA
	propranolol ext-rel	INDERAL XL
	propranolol ext-rel	INNOPRAN XL
	<b>propranolol inj</b>	
	<b>timolol</b>	

**AL:** Age Limit; **OTC:** Over the counter; **PA:** Prior Authorization; **QL:** Quantity Limit; **SP:** Specialty Drug; **ST:** Step Therapy  
**boldface:** indicates generic availability; delayed-rel: delayed-release (also known as enteric-coated);  
ext-rel: extended-release (also known as sustained-release)

## BETA-BLOCKER/DIURETIC COMBINATIONS

Guidelines for the use of beta-blockers and diuretic combinations in various patient populations are available at:

<http://jama.jamanetwork.com/article.aspx?articleid=1791497>

<http://www.acc.org>

atenolol/chlorthalidone	TENORETIC
bisoprolol/hydrochlorothiazide	ZIAC
metoprolol/hydrochlorothiazide	LOPRESSOR HCT
nadolol/bendroflumethiazide	CORZIDE
propranolol/hydrochlorothiazide	

## CALCIUM CHANNEL BLOCKERS

### Dihydropyridines

amlodipine	NORVASC
felodipine ext-rel	
nifedipine ext-rel	ADALAT CC
nifedipine ext-rel	PROCARDIA XL
PA nimodipine oral soln	NYMALIZE

### Nondihydropyridines

diltiazem	CARDIZEM
diltiazem ext-rel	
diltiazem ext-rel	CARDIZEM CD
diltiazem ext-rel	CARDIZEM LA
diltiazem ext-rel	TIAZAC
verapamil ext-rel	CALAN SR
verapamil ext-rel	VERELAN

## DIGITALIS GLYCOSIDES

digoxin 0.125 mg, 0.25 mg	LANOXIN
digoxin ped elixir	

## DIURETICS

### Carbonic Anhydrase Inhibitors

acetazolamide	
acetazolamide ext-rel	DIAMOX SEQUELS
methazolamide	

### Loop Diuretics

bumetanide	
furosemide	LASIX
toremide	DEMADEX

### Potassium-sparing Diuretics

amiloride	
-----------	--

### Thiazides and Thiazide-like Diuretics

chlorothiazide susp	DIURIL
chlorthalidone	
hydrochlorothiazide	
indapamide	
methyclothiazide	
metolazone	

### Diuretic Combinations

amiloride/hydrochlorothiazide	
-------------------------------	--
