A Newsletter for CareSource Members

Your Voice Matters & We Want to Hear it!

What you think about your CareSource health plan and the services we provide **matters**. Your feedback helps us ensure you get the highest quality of care.

We partner with Press Ganey each spring to ask you about your health care experiences. Members are chosen at random to take the survey. Your information is anonymous. It may come to you by email, mail or phone call.

Here's what we learned from last year's survey:

Areas we scored well in include:

- Getting care quickly
- Customer service
- Communication from your doctor

Areas we've been working on to improve your experience include:

- Easier to understand benefits education
- Easier access to support services like food, housing, rides
- More access to after-hours care through telehealth

**If you receive the survey, we hope you will take it.
If you have already taken the survey, thank you!**

Super Filling Foods for You

Some foods you eat can help you feel fuller longer. This is helpful when you are on the go or on a limited budget.

Protein is the most filling macronutrient. Foods high in protein include lean meat, fish, eggs or quinoa. Foods high in fiber take longer to digest and help you feel fuller longer. Oatmeal, vegetables, fruits and legumes are all higher in fiber. Soups and salads can be low-calorie, but high in nutrients which can help fill you up.

Some great filling snacks are Greek yogurt, cottage cheese, prunes, nuts or unbuttered popcorn.

If you need help getting healthy food, you may qualify for the Supplemental Nutrition Assistance Program (SNAP). Learn more and apply at www.fssabenefits.in.gov/bp/.

Mental Health Follow Up Care for a Healthier You

Follow up care is key if you have been hospitalized for mental health concerns.

You need to have a follow up visit with your mental health provider within 7 days of leaving the hospital.

Why do you need a follow up visit? Good follow up care lowers your risk of being admitted to the hospital again. Your provider can go over and make changes to any medications you may be on. They can also help support you as you move back to home, work or school. Your mental health provider is a key partner in your care. They help you build on the progress you made during your hospital stay.

Call Member Services if you have questions about how to get follow-up care. The number is on the back of this newsletter. We can also give you a ride to your visit. Call us **two business days** before your visit to set up a ride.

Break Free From Tobacco!

Take back your health and give up tobacco. Did you know smoking is the number one cause of preventable disease and death in the world? Secondhand smoke is also a serious hazard. It causes more than 41,000 deaths every year. Who will you protect by giving up tobacco?

If you want help, call the tobacco quit line at 1-800-784-8669.

You can also call our CareSource24 Nurse Advice Line. We can answer questions about quitting. We can answer other health questions too! We are here to help you 24/7/365. Call **1-800-QUIT-NOW (1-800-784-8669)**.

Avoiding Microplastics

Microplastics are tiny pieces of plastic smaller than a grain of sand. They are in the ocean, soil and air. The average person consumes about 5 grams of plastic each week. That's about the weight of a credit card! We still do not know how microplastics affect human health. Microplastics have been found in the lungs, blood and even placentas of humans.

How can you help reduce microplastics? Limiting your daily plastic use is a good first step. Bring reusable bags to the grocery store, try a reusable water bottle instead of single-use bottles and trade a wood cutting board for your plastic board. Plastics are hidden in many of our personal care products. Common ingredients like polyethylene or polypropylene are microplastics. Limit your use of these products when you can. Small changes can make a big difference.
