

Member On-Hold Message -- Well-Child/Immunizations

Your child needs regular check-ups with his or her doctor to stay well. This is important even if your child isn't sick. The doctor will check to make sure your child is growing and doing the right things for their age. Your doctor may give your child important immunizations at this visit. The doctor might also do a lead screening test. Please call today and make an appointment for a well-child check-up.
