

## Network Notification

**Notice Date:** February 12, 2018  
**To:** Indiana HHW and HIP Health Partners  
**From:** CareSource®  
**Subject:** Diabetes Retinal Eye Exam

Your patients with diabetes are at increased risk for eye problems, including complications like retinopathy, cataracts and glaucoma. Diabetic retinopathy is the most common diabetic eye disease, and it is the most common cause of new blindness cases in adults between the ages of 20 and 74 in developed countries<sup>1</sup>. CareSource recommends the American Diabetes Association Standards to help inform and guide the care of your CareSource patients who have diabetes diagnoses.

CareSource uses the NCQA HEDIS® Comprehensive Diabetes Care measure to monitor your patients' quality of care. The measure is defined as the percentage of adults 18 to 75 years of age with diabetes (Type 1 and Type 2) who had one of the following:

- A retinal or dilated eye exam by an eye care professional (optometrist or ophthalmologist) in the measurement year
- A *negative* retinal or dilated eye exam (negative for retinopathy) by an eye care professional in the year prior to the measurement year
- Bilateral eye enucleation any time during the patient's history through December 31 of the measurement year

Documentation of the retinal or dilated eye exam includes:

- A note/letter from an ophthalmologist, optometrist, primary care provider or other health care professional stating that the ophthalmoscopic exam was completed by an eye care professional, which includes the date and result of the exam
- A chart or retinal photograph indicating the date that the exam was performed and evidence of the test being read by an eye care professional or a qualified reading center operating under the direction of a medical director who is a retinal specialist
- A negative retinal or dilated exam by eye care professional in the year prior to the current year stating "retinopathy not present" or "normal findings" on dilated or retinal eye exam

**Please remember to submit claims with the appropriate codes for the eye exam services that were completed.** Please see the table below for more information.
