Prescriber Information

Name: _____ NPI/DEA: _____ Specialty: _____
 Address: _____
 Office Contact: _____ Phone: _____ Fax: _____

Diagnosis & Required Information

- Diagnosis Code (ICD-10): _____
- Prescriber attests to OARRS review prior to writing prescription. Date Reviewed: _____
- Prescriber attests benefits and risks of opioid therapy have been discussed with patient.
- Prescriber attests patient's documented treatment plan includes pain and function scores, a baseline urine drug test, plans for random urine drug screens, and an opioid contract.
- Prescriber attests to periodic assessment of patient's outcomes (including adherence, progress notes documenting pain and function scores, random urine drug screens, no serious adverse outcomes) to ensure that continued therapy outweighs risk to patient safety.
- Prescriber attests to reassessment of patient's addiction risk or mental health concerns (e.g., using Screening, Brief Intervention, and Referral to Treatment [SBIRT] tools), including referral to an addiction medicine specialist when appropriate.
- If the patient is taking a benzodiazepine, prescriber affirms to assessment to ensure benefit outweighs the risk of benzodiazepine use along with the opioid analgesic.
- If patient's cumulative dose of opioids is above 80 MED per day, prescriber must be a pain specialist or must attest to consulting a pain specialist. If pain specialist is unavailable, provide documentation supporting so and rationale for higher dose.
- Prescriber attests member has tried and failed at least two preferred non-opioid analgesics (NSAIDs, APAP, anticonvulsants, antidepressants) at maximally tolerated doses unless all contraindicated. Please list drugs that have been tried and/or explanation of contraindication.
