

Network Notification

Date: May 15, 2017
To: Kentucky Medicaid Health Partners
From: Humana – CareSource
Subject: Kentucky Health Information Exchange

Humana – CareSource encourages all providers in our network to establish connectivity with the Kentucky Health Information Exchange (KHIE) and recommends hospitals submit ADTs (Admission, Discharge and Transfer messages) to KHIE. If providers do not have an electronic health record, Humana – CareSource encourages the providers to sign a participation agreement with KHIE and sign up for Direct Secure Messaging services so that clinical information can be shared securely with other providers in their community of care. Please note that the Department for Medicaid Services may, at its discretion, mandate provider participation with at least ninety (90) days written notice to Humana – CareSource.

The KHIE is a secure, interoperable network in which participating providers with certified electronic health record technology (CEHRT) can access, locate, and share needed patient health information with other providers, at the point of care.

The Health Information Exchange provides a common, secure electronic information infrastructure that meets national standards to ensure interoperability across various health systems—while affording health care providers the functionality to support preventive health and disease management.

KHIE serves as the intermediary for public health reporting in the state of Kentucky and works with providers and hospitals. Ultimately, KHIE strives to improve care coordination and overall health outcomes while facilitating the adoption, integration, and the meaningful use of CEHRT.

Visit the KHIE website and learn how to make the KHIE Connection at www.KHIE.ky.gov.
