Georgia
Drug Formulary

2022

INTRODUCTION

We are pleased to provide the 2022 CareSource Drug Formulary. The Drug Formulary is a list of the drugs covered by CareSource.

This document is divided into three parts:

1. The Introduction – Provides important facts about the CareSource prescription drug benefit. This section explains terms, such as network pharmacy, prior authorizations, quantity limits, step therapy, therapeutic interchange and exceptions.
2. The [Drug Formulary](#) – Lists the drugs we cover.
3. The [Index](#) – Lists all of the covered drugs in alphabetical order. You can find the Index in the back of this document.

PRESCRIPTION DRUG COVERAGE DETAILS

Best Medical Practices

We want to make sure our members get the safest, most cost-effective drugs for their needs. We use evidence-based guidelines to make sure our Formulary meets best medical practices.

Network Pharmacies

CareSource provides coverage for prescription drugs and some prescription medical supplies.

CareSource contracts with pharmacies in order to provide members with a full range of prescription benefits. Members may choose and receive prescriptions from any pharmacy that is contracted with CareSource. These are often referred to as network pharmacies. It is important that members receive prescriptions from network pharmacies because prescriptions received from non-network pharmacies are generally not reimbursable or covered by CareSource, except as otherwise required by applicable federal and state law and your Evidence of Coverage. Accordingly, members may be responsible for the entire amount charged by a non-network pharmacy.

Network pharmacies can include local pharmacies, mail-order pharmacies or specialty pharmacies. To find a network pharmacy, use our online Find a Pharmacy tool under Quick Links at CareSource.com/marketplace.

CareSource may also cover drugs administered in the member's home, such as medicines given through a home health agency.

Cost Sharing

Members may pay part of the costs of some drugs and supplies. These cost-sharing amounts are called deductibles, copays and/or coinsurance. For some drugs, members may pay coinsurance. Coinsurance is a percent of a drug's cost.

The Drug Formulary shows drugs in different levels or tiers. Drugs are grouped into tiers based on the amounts that members pay.

Tiered Medications

The CareSource Formulary has up to six levels or tiers, including tiers 0, 1, 2, 3, 4 and 5. Some benefit designs only have five tiers. If a benefit design only has five tiers anything shown in this document as a tier 5 drug will process under the tier 4 price structure. In general, the higher the cost-sharing tier number, the higher the cost for the drug. In general, the copay amount increases as the tier number increases. All deductibles, coinsurance and copay amounts paid count toward members' maximum out-of-pocket amount.

To find tier levels for drugs, go to the [drug list](#) section of this document.

Prior Authorizations

CareSource may require health partners (doctors or other providers) to send us information about why a drug or a certain amount is needed. This is called a prior authorization request. CareSource must approve the request before a member can get the drug. The abbreviation "PA" is used in the Drug Formulary to show that a prior authorization is needed.

Here are some reasons for a prior authorization:

- A generic or alternative drug is available.
- The drug can be misused or abused.
- The drug requires special handling, monitoring or is available from limited shipping locations.
- There are other drugs that must be tried first.

Prior Authorization Requests

Health partners may make prior authorization requests by phone or fax. Please call the Provider Services telephone number for your state and follow the prompts, or fax to the Medical Management provider fax number for your state.

We may not approve a prior authorization request for a drug. If we don't, we will send the member information about how to appeal our decision.

Quantity Limits

Some drugs have limits on how much can be given to a member at one time. The abbreviation “QL” is used in the Drug Formulary to show there is a quantity limit.

Quantity limits are based on the drug makers’ recommended dosing frequencies. Patient safety is also considered. Quantity limits are based on the drug makers’ recommended dosing frequencies. Patient safety is also considered.

Therapy with opioid analgesics may have quantity limits based on drug makers’ recommended dosing frequencies and/or state regulations.

Step Therapy

Members may need to try one drug before taking another. This is called Step Therapy. A member must first try one medicine on the Formulary before another Formulary drug would be approved for use.

CareSource will cover certain drugs only if Step Therapy is used. The abbreviation “ST” is used in the Drug Formulary to show when Step Therapy is required.

Generic Substitution and Therapeutic Interchange

A pharmacy may provide a generic drug in place of a brand-name drug. This is called generic substitution. Members and health partners can expect the generic to produce the same effect and have the same safety profile as the brand-name drug. This is known as therapeutic interchange.

Generic drugs usually cost less than their brand-name equivalents.

Note to Health Partners: Generic drugs should be considered the first line of prescribing, subject to applicable rules. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drugs.
- Manufactured in the same strength and dosage form as the brand-name drugs.

In most instances, a brand-name drug for which a generic product becomes available will become non-Formulary, with the generic product covered in its place, upon release of the generic product onto the market. However, the Formulary document is subject to state-specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Choosing a brand drug when there is a generic available may cost you more. When a generic is available and you choose the brand name drug, you may be responsible to pay the cost difference between the two in addition to your copay or coinsurance. Or you could be responsible for the entire cost of the brand.

Tell Us the Medical Reasons for Exceptions

Sometimes a member may have a drug allergy or intolerance. Or, a certain drug may not be effective for a member. In these cases, the member or the member's representative may ask for an exception to a drug listed on the Drug Formulary. The member or member's representative must call Member Services to make the request. The member services telephone number for your state is listed on the back of the member ID card.

CareSource then contacts the appropriate health partner. CareSource may ask the health partner to provide written clinical documentation about why the member needs an exception. Health partners must provide this information.

Typically, our Drug Formulary includes more than one drug for treating a condition. These medicines are called "alternative" drugs. CareSource will generally not approve the request for an exception if an alternative drug would be just as effective as the drug requested and would not cause other health problems.

Specialty Pharmacy

CareSource works with Accredo Pharmacy to supply specialty medications that health partners may prescribe. Accredo Pharmacy can:

- **Help members get prescriptions filled or moved to Accredo Pharmacy from another pharmacy**
- **Deliver members' specialty medicines to their homes, workplaces or their doctors' offices**
- **Help members learn about their specialty medications and give them support from specially-trained health care professionals**

For more information, call Accredo Pharmacy at 1-866-231-3520. Hours are Monday through Friday from 8 a.m. to 11 p.m. Eastern Standard Time (EST).

Mail Order Medications

CareSource works with Express Scripts Pharmacy to supply prescription medicines to members' homes. This could change a member's copay amount. Express Scripts Pharmacy can:

- **Help members get prescriptions filled or moved to Express Scripts Pharmacy from another pharmacy.**
- **Deliver prescriptions to members' homes, workplaces or doctors' offices.**

For more information, call CareSource Member Services at 1-833-230-2030. Hours are Monday through Friday from 7 a.m. to 7 p.m. EST.

Members may also access the express-scripts.com website through the My CareSource member portal to manage prescription refills for their specialty and mail order medications and to check coverage. To create an account on the My CareSource member portal, go to mycaresource.com.

Medications Administered in the Health Partner Setting

Medications that are administered in a health partner setting will be billed to the health plan under your medical benefit. Such settings include a physician office, hospital outpatient department, clinic, dialysis center, or infusion center. Prior authorization requirements now exist for many injectable medicines.

Medication Therapy Management Program

CareSource offers a Medication Therapy Management (MTM) program for all members. MTM services allow local pharmacists to work with doctors and other prescribers to enhance quality of care, improve medication compliance, address medication needs, and provide health care to patients in a cost-effective manner. Members and health partners may be contacted by a pharmacist to discuss medications. We encourage members to talk with their pharmacists about their medications. This can help members to get the best results from the medications they are taking.

HOW TO USE THIS DOCUMENT

Go to the [Index](#) to look up a drug by name. Drugs are listed in alphabetical order. The Index will show the page number on which the drug is found in the Drug Formulary. Turn to that page number to get details about the drug.

Note to Health Partners: The CareSource Drug Formulary is organized by sections. Each section is divided by therapeutic drug class, primarily defined by mechanism of action. Products are listed by generic name with brand name for reference only. Unless the cited drug is available as an injectable or an exception is specifically noted, generally, all applicable dosage forms and strengths of the drug cited are included in the document.

ADDITIONAL INFORMATION FOR HEALTH PARTNERS

The drugs represented have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and then approved by a local Pharmacy, Therapeutics and Technology (PT&T) Committee for inclusion. The document is reflective of current medical practice as of the date of review.

The information contained in this document and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information, nor is it intended to be comprehensive in nature. This document is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in the document is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

National guidelines can be found on the National Guideline Clearinghouse site at www.guideline.gov.

CARESOURCE ONLINE FORMULARY SEARCH TOOLS AVAILABLE

CareSource has easy-to-use online drug formulary tools that can help you save time by quickly looking up medications to make sure they are covered by CareSource. Also, you can check for generic alternatives, prior authorization requirements, and any restrictions or limits that may apply. To start using the tool, visit CareSource.com, and visit the Pharmacy page of the appropriate line of business, and select Formulary Search Tool. You can also find CareSource policies on the CareSource.com Health Partner Policies page.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of an independent National Pharmacy and Therapeutics (P&T) Committee are utilized to approve safe and clinically effective drug therapies. The P&T Committee is an external advisory body of experts from across the United States. The P&T Committee's voting members include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Employees with significant clinical expertise are invited to meet with the P&T Committee, but no employee may vote on issues before the P&T Committee. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

In addition to the National P&T Committee review, the CareSource Pharmacy Therapeutics and Technology (PT&T) Committee makes formulary recommendations based upon the needs of regional member demographics. The CareSource PT&T Committee is comprised of the Plan's Medical Directors, Pharmacy staff and representatives from the medical community.

DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms on the document are covered, we have provided examples below. The general principles shown in the examples can usually be extended to other entries in the document.

When a strength, dosage or different formulation is specified, only that specific strength, dosage or formulation may be covered. Other strengths/dosages/formulations, including injectable dosage forms of the reference product, are not covered.

Extended-release and delayed-release products require their own entry.

metformin

Glucophage

The immediate-release product listing of Glucophage alone would not include the extended-release product Glucophage XR.

metformin ext-rel

Glucophage XR

A separate entry for Glucophage XR confirms that the extended-release product is on the document.

Dosage forms on the document will be consistent with the category and use where listed.

neomycin/polymyxin B/hydrocortisone Cortisporin

Since Cortisporin is listed only in the OTIC section, it is limited to the OTIC solution and suspension. From this entry the topical cream cannot be assumed to be on the list unless there is an entry for this product in the DERMATOLOGY section of the document.

PLAN DESIGN

The document represents a closed formulary plan design. The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a Formulary exception may be requested for coverage. Medical necessity or Formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria.

List of Abbreviations

ACA: Affordable Care Act.

LA: Limited Availability. This prescription may be available only at certain pharmacies. For more information, please call Customer Service.

OTC: Over the Counter. An OTC drug is a non-prescription drug.

PA: Prior Authorization. The Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval before you fill your prescriptions. If you don't get approval, we may not cover the drug.

QL: Quantity Limit. For certain drugs, the Plan limits the amount of the drug that we will cover.

ST: Step Therapy. In some cases, the Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.
