|------------------|--|
| DRUG NAME | Harvoni (ledipasvir/sofosbuvir) |
| BENEFIT TYPE | Pharmacy |
| STATUS | Prior Authorization Required |

Harvoni is a fixed-dose combination of ledipasvir, a hepatitis C virus (HCV) NS5A inhibitor, and sofosbuvir, an HCV nucleotide analog NS5B polymerase inhibitor. It was initially approved by the FDA in 2014 and is indicated for the treatment of chronic hepatitis C virus (HCV) in adults and pediatric patients 3 years of age and older.

Harvoni (ledipasvir/sofosbuvir) will be considered for coverage when the following criteria are met:

Hepatitis C

For initial authorization:

1. Member must be 3 years of age or older; AND
2. Member has diagnosis of hepatitis C without cirrhosis or with compensated cirrhosis (Child-Pugh Class A) and documentation of genotype 1, 4, 5 or 6; OR
3. Member has a diagnosis of hepatitis C with decompensated cirrhosis (Child-Pugh B or C) and **BOTH** of the following:
 - a) Documentation of genotype 1;
 - b) Provider attests member will be taking Harvoni with ribavirin; OR
4. Member is post-liver transplant with a diagnosis of hepatitis C without cirrhosis or with compensated cirrhosis (Child-Pugh Class A) and **BOTH** of the following:
 - a) Documentation of genotype 1 or 4;
 - b) Provider attests member will be taking Harvoni with ribavirin; AND
5. Member has had a trial and failure of sofosbuvir/velpatasvir (generic for Epclusa) or ledipasvir/sofosbuvir (generic for Harvoni) or acceptable clinical reason must be provided as to why sofosbuvir/velpatasvir or ledipasvir/sofosbuvir cannot be used; AND
6. Chart notes include documentation of viral load (taken within 6 months of beginning therapy).

7. Dosage allowed/Quantity limit:

Adult patients: One tablet (90 mg of ledipasvir and 400 mg of sofosbuvir) orally once daily. Quantity limit: 28 tablets per 28 days.

Pediatric patients 3 years of age or older: see table below. Quantity limit: for the 45mg/200mg strength, 56 tablets or pellet packets per 28 days. For the 90 mg/400mg and 33.75mg/150mg strength, 28 tablets or pellet packets per 28 days.

| Body Weight (kg) | Dosing of Harvoni Tablets or Oral Pellets |
|-------------------------|--|
| At least 35 kg | One 90 mg/400mg tablet once daily or Two 45mg/200mg tablets once daily or Two 45mg/200mg packets of pellets once daily |
| 17 to less than 35 kg | One 45mg/200mg tablet once daily or One 45 mg/200 mg packet of pellets once daily |
| Less than 17 kg | One 33.75mg/150mg packet of pellets once daily |

If all the above requirements are met, the medication will be approved for 12-24 weeks per Appendix A (see below).

For reauthorization:

1. Harvoni will not be reauthorized.

CareSource considers Harvoni (ledipasvir/sofosbuvir) not medically necessary for the treatment of conditions that are not listed in this document. For any other indication, please refer to the Off-Label policy.

| DATE | ACTION/DESCRIPTION |
|-------------------|---|
| 05/09/2017 | New policy for Harvoni created. Criteria coverage was adjusted for age, alternative products were indicated. Hep B test requirement was added. Drug and alcohol screens for 3 consecutive months required for all regardless of abuse history. Evidence of liver fibrosis exceptions was expanded. Reauthorization requirement of 2 consecutive values of HCV RNA \geq 25 IU per mL during the post-treatment period and documented reason of treatment failure were added. |
| 06/08/2017 | Fibrosis stage 2 and above covered. |
| 11/22/2017 | Substance abuse program information is no longer required. Criterion on absence of moderate to severe liver impairment was added. |
| 12/07/2017 | Criterion of "life expectancy not less than one year due to non-liver related comorbidities" removed from criteria and added in a form of the note. Hepatitis B testing is no longer required. |
| 12/21/2017 | Fibrosis score requirement was removed. |
| 05/01/2019 | Sofosbuvir/velpatasvir (generic for Epclusa) trial added for adult members; Mavyret trial added for members 12-17 years of age. |
| 4/26/2020 | Harvoni's age indication expanded to include age 3 or older. Criteria were adjusted for age and drug trials accordingly. |
| 05/04/2021 | Updated treatment appendix. Reworded the trial requirements to be more clear (neutral change). Removed requirement that member does not have severe hepatic impairment (child-pugh B and C). Removed reauthorization criteria and replaced with "Harvoni will not be reauthorized". |
| 02/24/2022 | Transferred to new template. Removed drug screen requirement. Updated references. Updated pediatric dosing for Harvoni and Ribavirin. Added criteria for decompensated cirrhosis and liver transplant patients. Simplified wording for preferred Mavyret trial. |
| 04/12/2023 | Removed provider specialty requirement. |
| 03/12/2025 | Updated references; removed Ribavirin dosing (Appendix B); added confirmation of hepatitis C diagnosis; added quantity limits; replaced trial of generic Epclusa and Mavyret with trial of preferred DAA and expanded trial to decompensated and post liver-transplant |

Appendix A: Treatment Duration

| HCV Genotype | Patient Population | Treatment Regimen and Duration |
|----------------------------|---|---------------------------------|
| Genotype 1 | Treatment-naïve without cirrhosis or with compensated cirrhosis (Child-Pugh A) | Harvoni 12 weeks |
| | Treatment-experienced without cirrhosis | |
| | With decompensated cirrhosis (Child-Pugh B or C) | Harvoni + ribavirin 12 weeks |
| | Treatment-experienced with compensated cirrhosis (Child-Pugh A) | Harvoni 24 weeks |
| Genotype 1 or 4 | Liver transplant recipients without cirrhosis, or with compensated cirrhosis (Child-Pugh A) | Harvoni + ribavirin 12 weeks |
| Genotype 4, 5, or 6 | Without cirrhosis or with compensated cirrhosis (Child-Pugh A) | Harvoni 12 weeks |

Effective date: 10/01/2025

Revised date: 12/15/2025
