Administrative Policy Statement prepared by CareSource and its affiliates are derived from literature based on and supported by clinical guidelines, nationally recognized utilization and technology assessment guidelines, other medical management industry standards, and published MCO clinical policy guidelines. Medically necessary services include, but are not limited to, those health care services or supplies that are proper and necessary for the diagnosis or treatment of disease, illness, or injury and without which the patient can be expected to suffer prolonged, increased or new morbidity, impairment of function, dysfunction of a body organ or part, or significant pain and discomfort. These services meet the standards of good medical practice in the local area, are the lowest cost alternative, and are not provided mainly for the convenience of the member or provider. Medically necessary services also include those services defined in any Evidence of Coverage documents, Medical Policy Statements, Provider Manuals, Member Handbooks, and/or other policies and procedures.

Administrative Policy Statements prepared by CareSource and its affiliates do not ensure an authorization or payment of services. Please refer to the plan contract (often referred to as the Evidence of Coverage) for the service(s) referenced in the Administrative Policy Statement. If there is a conflict between the Administrative Policy Statement and the plan contract (i.e., Evidence of Coverage), then the plan contract (i.e., Evidence of Coverage) will be the controlling document used to make the determination.

According to the rules of Mental Health Parity Addiction Equity Act (MHPAEA), coverage for the diagnosis and treatment of a behavioral health disorder will not be subject to any limitations that are less favorable than the limitations that apply to medical conditions as covered under this policy.

Claims Editing and Review

B. Background

All health care providers are expected to utilize the same standard coding sets and rules to codify the services provided during encounters with patients. This codification is used to bill insurance carriers for reimbursement, known as a 'claim'. In the codification process, there are rules that must be followed to appropriately codify the encounter into a claim, which is then sent to the insurance carrier for reimbursement.

All claims submitted to CareSource for reimbursement consideration are subject to claims editing. This ensures that appropriate coding sets are used and, rules are applied in billing by the provider. This also ensures that appropriate reimbursement is made to the provider for services rendered. This policy aims to outline the source of edits and rules CareSource utilizes for claims editing and review.
