

PHARMACY POLICY STATEMENT

Georgia Medicaid

DRUG NAME	Macrilen (macimorelin)
BENEFIT TYPE	Pharmacy or Medical
STATUS	Prior Authorization Required

Macrilen is a growth hormone (GH) secretagogue receptor agonist initially approved by the FDA in 2017. It is indicated for the diagnosis of adult growth hormone deficiency (AGHD) and is the first and only FDA-approved oral test for AGHD diagnosis. The efficacy of Macrilen was established in a randomized, open-label, single-dose, cross-over study. Macrilen was compared to the insulin tolerance test (ITT) in a head to head trial with 140 adults where the overall diagnostic accuracy of Macrilen was comparable to the ITT.

Macrilen (macimorelin) will be considered for coverage when the following criteria are met:

Diagnostic Use for Growth Hormone Deficiency

For **initial** authorization:

1. Member is age 18 years or older; AND
2. Medication must be prescribed by or in consultation with an endocrinologist; AND
3. Member's weight is documented on chart notes and member's BMI is $\leq 40 \text{ kg/m}^2$; AND
4. Member must have documentation of a contraindication or intolerance to **BOTH** the insulin tolerance test and glucagon stimulation test.
5. **Dosage allowed/Quantity limit:** 0.5 mg/kg as single dose. Quantity Limit: One pouch for weight $\leq 120 \text{ kg}$. Two pouches for weight $>120 \text{ kg}$.

If all the above requirements are met, the medication will be approved for 30 days.

For **reauthorization**:

1. Macrilen will not be reauthorized.

CareSource considers Macrilen (macimorelin) not medically necessary for the treatment of conditions that are not listed in this document. For any other indication, please refer to the Off-Label policy.

DATE	ACTION/DESCRIPTION
10/20/2018	New policy for Macrilen created.
11/08/2022	Annual Review. Transferred to new template. Updated references. Added medical benefit. Updated the preferred test to ITT and GST.
09/19/2023	Added in consultation with prescriber specialty.
