Breyanzi is a CD19-directed chimeric antigen receptor (CAR) T-cell therapy initially approved by the FDA in February 2021 for the treatment of relapsed or refractory large B-cell lymphoma after 2 or more lines of systemic therapy. Lymphoma is a cancer of the lymphatic system and white blood cells. Competitor CAR-T products include Kymriah and Yescarta. As of June 2022, Breyanzi is also indicated after just 1 line of therapy when certain qualifications are met.

Breyanzi (lisocabtagene maraleucel) will be considered for coverage when the following criteria are met:

**Large B-Cell Lymphoma (LBCL)**

For *initial* authorization:
1. Member is at least 18 years of age; AND
2. Healthcare facility/provider has enrolled in the Breyanzi REMS; AND
3. Member has a diagnosis of large B-cell lymphoma including any of the following:
   a) Diffuse large B-cell lymphoma (DLBCL) not otherwise specified (including DLBCL arising from indolent lymphoma)
   b) High grade B-cell lymphoma
   c) Primary mediastinal large B-cell lymphoma
   d) Follicular lymphoma grade 3B; AND
4. Member has been treated with first line therapy containing an anthracycline and rituximab (or another CD20-targeted agent); AND
5. Member meets one of the following:
   a) Relapsed or refractory disease after two or more lines of systemic therapy
   b) Refractory disease to first-line chemoimmunotherapy (primary refractory) or relapse within 12 months of first-line chemoimmunotherapy
   c) Refractory disease to first-line chemoimmunotherapy (primary refractory) or relapse after first-line chemoimmunotherapy and ineligible for hematopoietic cell transplant (HCT) due to comorbidities or age; AND
6. Member has an Eastern cooperative oncology group (ECOG) performance status of 0 or 1; AND
7. Member does not have any of the following:
   a) Primary central nervous system (CNS) lymphoma;
   b) Prior CAR T-cell or other genetically-modified T-cell therapy (e.g. Yescarta, Kymriah);
8. Member has been screened for hepatitis B virus (HBV), hepatitis C virus (HCV), and human immunodeficiency virus (HIV).
9. **Dosage allowed/Quantity limit:**
   Relapsed or refractory after 2 or more lines of therapy: A single dose of 50 to 110 × 10^6 CAR-positive viable T cells
Relapsed or refractory after 1 line of therapy: A single dose of 90 to 110 × 10^6 CAR-positive viable T cells

If all the above requirements are met, the medication will be approved for 3 months.

For reauthorization:
1. Breyanzi will not be reauthorized for continued therapy.

CareSource considers Breyanzi (lisocabtagene maraleucel) not medically necessary for the treatment of conditions that are not listed in this document. For any other indication, please refer to the Off-Label policy.
