

## CATEGORY PROCEDURAL TERMINOLOGY (CPT) CATEGORY II CODES

## What is a CPT II Code?

CPT II codes are a set of alphanumeric medical codes used to track performance measures and quality indicators. A CPT II code typically consists of four digits, followed by the letter "F". The four digits denote the specific performance measure or clinical concept. The "F" indicates it's a tracking code.

## Why use CPT II codes?

The codes provide a standardized way to measure and report health care quality. These codes help in tracking specific aspects of patient care, facilitating quality improvement initiatives.

## Using CPT II codes will help to:

- Improve health outcomes with a more comprehensive view of a member's health status.
- More accurate information helps to identify opportunities to improve patient care. Improved patient care can help **improve HEDIS measurement** scores for your provider practice.
- Reduce medical record requests. Adding CPT II codes improves the accuracy of the record, reducing the need for chart review.

Also report date of visit and, in a separate field, the date of the last menstrual period (LMP). (Prenatal)  Prenatal flow sheet documented in medical record by first prenatal visit (documentation includes at minimum blood pressure, weight, urine protein, uterine size, fetal heart tones, and estimated date of delivery). Report also: date of visit and, in a separate field, the date of the LMP. (Note: If reporting 0501F Prenatal flow sheet, it is not necessary to report 0500F Initial prenatal care visit). (Prenatal)
