Myoelectric Lower Extremity Prosthetic Technology-MI Health Link-MM-1568	12/01/2024-07/31/2025			
Policy Type				
MEDICAL				

Medical Policy Statement prepared by CareSource and its affiliates are derived from literature based on and supported by clinical guidelines, nationally recognized utilization and technology assessment guidelines, other medical management industry standards, and published MCO clinical policy guidelines. Medically necessary services include, but are not limited to, those health care services or supplies that are proper and necessary for the diagnosis or treatment of disease, illness, or injury and without which the patient can be expected to suffer prolonged, increased or new morbidity, impairment of function, dysfunction of a body organ or part, or significant pain and discomfort. These services meet the standards of good medical practice in the local area, are the lowest cost alternative, and are not provided mainly for the convenience of the member or provider. Medically necessary services also include those services defined in any Evidence of Coverage documents, Medical Policy Statements, Provider Manuals, Member Handbooks, and/or other policies and procedures.

Medical Policy Statements prepared by CareSource and its affiliates do not ensure an authorization or payment of services. Please refer to the plan contract (often referred to as the Evidence of Coverage) for the service(s) referenced in the Medical Policy Statement. If there is a conflict between the Medical Policy Statement and the plan contract (i.e., Evidence of Coverage), then the plan contract (i.e., Evidence of Coverage) will be the controlling document used to make the determination. According to the rules of Mental Health Parity Addiction Equity Act (MHPAEA), coverage for the diagnosis and treatment of a behavioral health disorder will not be subject to any limitations that are less favorable than the limitations that apply to medical conditions as covered under this policy.

A. Subject

Myoelectric Lower Extremity Prosthetic Technology

B. Background

The policy addresses the computerized limb prosthesis that is a nonstandard, external prosthetic device incorporating a microprocessor for movement control. These devices are equipped with a sensor that detects when the knee is in full extension and adjusts the swing phase automatically, permitting a more natural walking pattern of varying speeds.

C. Definitions

- Myoelectric Lower Extremity Prosthetic Technology Addition to lower extremity prosthesis, endoskeletal knee-shin system, microprocessor control feature, swing phase only, includes electronic sensor(s), any type.
- Classification Level Rehabilitation potential as described by Centers for Medicare & Medicaid Services:

2 2 a. 2 a. 2 a. 7 10 0 0 1		
Level 0: Does not have	a. The individual does not have sufficient cognitive ability to safely	
the ability or potential to	use a prosthesis with or without assistance.	
ambulate or transfer	b. The individual requires assistance from equipment or caregiver	
safely with or without	in order to transfer and use of a prosthesis does not improve	
assistance and a	mobility or independence with transfers.	
prosthesis does not	c. The individual is wheelchair dependent for mobility and use of a	
enhance their quality of	prosthesis does not improve transfer abilities.	
life or mobility	d. The individual is bedridden and has no need or capacity to	
j	ambulate or transfer.	
Level 1: Has the ability	a. The individual has sufficient cognitive ability to safely use a	
or potential to use a	prosthesis with or without an assistive device and/or the	
prosthesis for transfers	assistance/supervision of one person.	
or ambulation on level	b. The individual is capable of safe but limited ambulation within	
surfaces at fixed	the home with or without an assistive device and/or with or	
cadence, typical of the	without the assistance/supervision of one person.	
limited and unlimited	c. The individual requires the use of a wheelchair for most	
household ambulator.	activities outside of their residence.	
	d. The individual is not capable of most of the functional activities	
	designated in Level 2.	
Level 2: Has the ability	a. The individual can ambulate with or without an assistive device	
or potential for	(which may include one or two handrails) and/or with or without	
ambulation with the	the assistance/supervision of one person:	
ability to transverse low	i. Perform the level 1 tasks designated above	
level environmental	ii. Ambulate on a flat, smooth surface	
barriers such as curbs,	iii. Negotiate a curb	
stairs, or uneven	iv. Access public or private transportation	
surfaces. This level is	v. Negotiate 1-2 stairs	
	vi. Negotiate a ramp built to ADA specifications	

typical of the limited	b. The individual may require a wheelchair for distances that are	
community ambulator.	beyond the perimeters of the yard/driveway, apartment building,	
	etc.	
	c. The individual is only able to increase his/her generally observed	
	speed of walking for short distances or with great effort.	
	d. The individual is generally not capable of accomplishing most of	
	the tasks at Level 3 (or does so infrequently with great effort).	
Level 3: Has the ability	a. With or without an assistive device (which may include one or	
or potential for	two hand rails), the individual is independently capable (ie,	
ambulation with variable	requires no personal assistance or supervision) of performing	
cadence, typical of the	the Level 2 tasks above and can	
community ambulator	i. Walk on terrain that varies in texture and level (eg, grass,	
who has the ability to	gravel, uneven concrete)	
transverse most	ii. Negotiate 3-7 consecutive stairs	
environmental barriers	iii. Walk up/down ramps built to ADA specifications	
and may have	iv. Open and close doors	
vocational, therapeutic,	v. Ambulate through a crowded area (eg, grocery store, big	
or exercise activity that	box store, restaurant)	
demands prosthetic	vi. Cross a controlled intersection within his/her community	
utilization beyond	within the time limit provided (varies by location)	
simple locomotion.	vii. Access public or private transportation	
	viii. Perform dual ambulation tasks (eg, carry an item or	
•	meaningfully converse while ambulating)	
	b. The individual does not perform the activities of Level 4.	
Level 4: Has the ability	With or without an assistive device (which may include one or two	
or potential for	hand rails), this individual is independently capable (ie, requires no	
prosthetic ambulation	personal assistance or supervision) of performing high impact	
that exceeds the basic	domestic, vocational or recreational activities such as:	
ambulation skills,	a. Running	
exhibiting high impact,	b. Repetitive stair climbing	
stress or energy levels	c. Climbing of steep hills	
typical of the prosthetic	d. Being a caregiver for another individual	
demands of the child,	e. Home maintenance (eg, repairs, cleaning)	
active adult, or athlete.		

NOTE: Consideration is given to bilateral amputees who often cannot be strictly bound by the Classification Levels.

D. Policy

- I. CareSource considers myoelectric lower limb prosthetic technology medically necessary when the following criteria are met:
 - A. The member is 18 years of age or older.
 - B. The member has a lower extremity prosthesis(s).

- C. Documentation submitted supports medical necessity, follows standards for Durable Medical Equipmnt, Prosthetics, Orthotics and Supplies, and includes the following:
 - A written order/prescription from a treating practitioner for the additional technology
 - 2. Sufficient documentation of the rehabilitation potential including, but not limited to, clear documentation supporting the expected potential classification level that is K3 or above
 - 3. Characteristics, including
 - a. emotionally readiness
 - b. ability and willingness to participate in training
 - c. ability to care for the technology
 - d. physically ability to use the equipment
 - e. adequate cardiovascular and pulmonary reserve for ambulation at faster than normal walking speed

E. Conditions of Coverage N/A
