

Site of Care Management Program Announcement FOR MEMBERS

CareSource will launch the Site of Care Management Program on **July 1, 2026**. The Site of Care Management Program applies to our Marketplace Lines of Business.

Do you get specialty injectable medications or infusions?

The Site of Care Management Program helps you get specialty infusion drugs in the best and most affordable places. We want you to get the care you need while keeping costs down for you.

Which drugs are impacted by this program?

The program includes some specialty infusion drugs that need prior approval. You can review these medications using the [Site of Care Management Program Drug List](#).

How will I know if my medication is in the Site of Care Management Program?

If your drug is in the program, you will get a written notice in the mail. You can also look for it on the list above. Your healthcare provider can also give you information on your medication and places to get your injectable medications and infusions.

Benefits of the Program:

- **Improved Care Experience:** Get your treatments in settings that support your comfort and may be easier to access.
- **Cost Savings:** Infusions done in non-hospital settings can reduce overall healthcare costs.
- **Personalized Support:** Our team will work closely with your healthcare provider(s) to help with transitions and give you the best possible care.

Questions about your treatment and benefits of the Site of Care Management Program?

Contact Member Services at **1-833-230-2099 (TTY: 711)**. We are open Monday through Friday, 7 a.m. to 7 p.m. Eastern Time (ET).
