Subject: New Facility Code Edits for Hospital Claims

Effective October 1, 2013 CareSource will be implementing new Facility Code edits to be applied to hospital claims during claims processing.

Several of the new edits involve administrative types, such as:

- Invalid Diagnosis
- Invalid ICD-9-CM Procedure Codes
- Invalid Diagnosis based on age and gender, etc.

Also included in this release are NCCI Facility specific edits, such as:

- Facility MUEs (Medically Unlikely Edits)
- Column 1 / 2 edits
- Inappropriate Bilateral billing, etc.

CareSource is in the process of developing a Payment Policy that will cover all edits and will include a description of the edits and an example, where applicable. Please look for this policy within the next 30 days.

Thank you for your partnership with CareSource.
