

FALL 2020

MEMBER *Source*

A Newsletter for CareSource® Members

The New **Normal**

Face masks. Closed businesses. Social distancing. Kids on Zoom for school work. 2020 has created many changes to our lives. Some temporary, some more permanent.

For health care, things have changed as well. Telehealth is becoming a routine service. At CareSource, we have been working hard to give you the latest information about how to take care of yourself and your family. We want you to know that no matter what our new normal may look like, we are here for you.

Visit our COVID-19 web page at **CareSource.com/Covid19**. If you have a question or concern, call our Member Services team. We are happy to help. We are committed to providing you *Health Care with Heart*.

Still Need to Visit Your Provider In-Person?

It's OK to Return to the Doctor!

Find out the right approach from Dr. Dale Block, CareSource Ohio Medical Director. Go to **CareSource.com/ReturnToTheDoc** to watch the video.

CareSource®

Our Mobile App is **Easy to Use!**

Digital ID Card: view and share your digital CareSource member ID card.

Find a Doctor: find a doctor, drugstore, hospital, and more near you.

Call a Nurse: call the CareSource24® Nurse Advice Line and talk to a nurse 24/7.

MYidealDOCTOR®: talk with a primary care provider 24/7.

My CareSource: log into your secure My CareSource account.

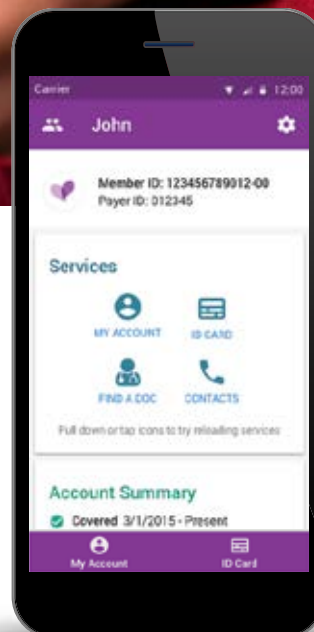

NEW! Message Center: get news and reminders from CareSource.

And More!

**Download the app and
check it out now.**

Some features are not active until your plan's effective date.

What to Expect at Your Next Dental Visit During COVID-19

At CareSource, our first priority is to protect you, our providers and community. We are closely watching the coronavirus (COVID-19) and its impact both locally and around the world. As we work with our provider networks, our goal is to help carry out and follow all steps to lessen the spread.

Talk to your dental provider to see if they offer teledentistry services. Teledentistry uses your phone, mobile app, or computer for exams when and where you want. Call your provider to find out the best way to setup a teledentistry visit. Visit **CareSource.com/Covid19** to learn more.

The Centers for Disease Control and Prevention (CDC) has a plan you can follow to prevent illness. The goal is to stop the spread of the disease.

- ✓ Before going into the office, let your dental provider know if you have had any symptoms such as fever, cough, trouble breathing, or other flu-like symptoms.
- ✓ Let them know if you or a member of your household has traveled to countries with high outbreaks.
- ✓ You may be asked to answer certain questions or fill out special forms.
- ✓ Due to social distancing, offices may ask family members to not sit in the waiting room. You may also be asked to use a cloth face covering or mask.

Visit cdc.gov/coronavirus/2019-ncov/hcp/dental-settings.html for more details on CDC guidelines in a dental setting. Please know that the recommendations may change with time.

Drug List Updates

CareSource has an easy to search drug list that is updated monthly on our website. Find out which drugs are covered by going to **CareSource.com/OhioMedicaid** and clicking *Find My Prescriptions* under *Tools & Resources*. If you don't have internet, we can help. Call Member Services to see if a drug is covered and if there is a cost to you.

CareSource24[®] Nurse Advice Line

Our staff of caring nurses are here 24/7 to talk to you. We can help if you get sick, hurt, or need answers to your health questions. We can also help you decide when self-care, a doctor's visit, urgent care, or an ER trip is needed.

Call **1-866-206-0554** (TTY: 1-800-750-0750 or 711) to learn more.

Preventing Diabetic Kidney Disease

If you have diabetes, your blood sugar levels are often too high. High blood sugar can harm your kidneys over time. Your kidneys clean your blood. If they are damaged, waste builds up in your blood stream instead of leaving your body.

Kidney damage from diabetes is called diabetic nephropathy. It happens slowly over many years. Most people do not show any signs or have symptoms.

You can help stop or delay kidney damage by getting routine screenings. This is the only way to know if you have diabetic kidney disease. The first type of screening looks for protein in your urine. The other is a blood test to show how well your kidneys are working.

You should get tested each year for kidney disease if you have type 2 diabetes. You should also get tested if you've had type 1 diabetes for more than five years. Talk to your primary care provider (PCP) to learn more.

Dealing with **Drug Supply Problems**

Dealing with the unknown is hard. COVID-19 has changed our lives. And when it comes to medicines, COVID-19 showed our drug supply can change quickly. Drug supply problems can happen even in less difficult times. CareSource understands how important it is that you have your medicine on hand. Make sure you don't run out because of a drug supply problem using the tips below.

Call your drugstore ahead of time.

If there is a problem with your medicine supply, call your provider as soon as you can. You can even ask most drugstores to call your provider for you.

Always talk to your provider before you stop taking a drug. Stopping a drug without talking to your provider can make your condition worse.

Back to SCHOOL?

If your children plan to return to school in fall of 2020, they will face a new norm of regular hand washing and proper cleaning and disinfecting. If your family homeschools or is choosing online school, you may want help making a plan.

Tips for a **safe return** to school:

Teach good hand washing skills.

Keep your children home if they are sick.

Send wipes, soap, and hand sanitizer to keep in desks and lockers.

Talk to them ahead of time about wearing a mask. Practice wearing them before school starts. Find some masks they enjoy wearing!

Source: www.cdc.gov/coronavirus/2019-ncov/daily-life-coping/children/learning.htm

Tips for a **virtual return to the classroom**:

Set up the same time every day for starting and ending schoolwork.

Set up a special homework/study area.

Take breaks outside!

Find ways to do schoolwork like math, reading, and writing by:

Cooking together

Reading recipes together

Writing letters to people kids can't visit in person

Let CareSource Help You **Be Healthier!**

CareSource is dedicated to helping improve your health and well-being. The Ohio Department of Medicaid and CareSource asks that all members complete the 2020 Health Risk Assessment (HRA). Using a few questions about your health and lifestyle, CareSource can help your providers coordinate your care.

You can take the HRA in one of these ways:

Phone. Call **1-844-972-0569** (TTY: 711) between 8 a.m. to 8 p.m. Eastern Standard Time, Monday through Friday.

Online. Just log into your secure **MyCareSource.com** account and click on the *Health* tab.

Post-Partum Visits and EPSDT

Post-Partum Visits

After you have your baby, make your post-partum appointment with your provider. A post-partum visit is important for both you and your baby. It makes sure you are healing well and gives you the chance to ask questions about things like birth control. It also lets your primary care provider (PCP) check on how you are feeling emotionally. Providers understand that the physical and emotional changes after birth can be stressful.

You should have your first visit within three weeks after delivery and a full exam within 12 weeks. You may need to see your provider sooner if you had a c-section or if they direct you to do so. To be sure you'll get to your provider, you can set up your post-partum visit before you leave the hospital. Follow your provider's directions if they want to see you sooner. CareSource can also help you get a ride if you need one.

EPSDT

Is your child ready to start school? As you prepare your child for school, they also need their well-child checkups. Follow CareSource's Early and Periodic Screening, Diagnostic and Treatment (EPSDT) schedule. EPSDT pays for screenings, visits to the dentist and eye doctor, immunizations and more for your child. CareSource can also help you get rides to well-child checkups if you need it. Be sure to reach out to your child's PCP before the school year to make your child's appointment.

Reminder: Telehealth Services are Available Any Time

With social distancing and new safety rules, many primary care providers (PCPs) now offer telehealth services. Telehealth is a visit with your PCP using your phone, mobile app, or computer. You can get care for common health issues without seeing your doctor in person. But, how does it work? Use the helpful tips below for your next telehealth visit.

Scheduling Your Visit

When scheduling your visit, ask questions so you know what to expect:

- Will you need to download an app?
- Is your provider calling you?
- Will you call your provider?
- Will the visit be by phone or online?

Talk to your PCP if you are worried about whether you'll be able to have a telehealth visit.

Before Your Visit

- Make notes about the questions you want to ask during your visit.
- Find a quiet place where you can talk openly about any issues you have. You can also answer questions that your provider asks about your health.

During Your Visit

- Be open and honest about your health and any symptoms you have.
- If you have questions about the visit and what type of care can be offered, be sure to ask. Telehealth is new for a lot of people. It is normal to have questions.
- Take notes so you can look back at the information you received.

At The End of Your Visit

Make sure you know the next steps or actions you need to take.

- Do you have a new prescription to fill?
- Do you need to have lab work done after the visit?
- Do you need to schedule another visit?

Check with your PCP's office to find out how and when you can have a telehealth visit. If your PCP doesn't offer telehealth or has limited hours, you can call MYidealDOCTOR®. The cost is the same as a visit to your PCP. You can reach MYidealDOCTOR 24/7, 365 days a year. You can find a link on the CareSource mobile app, call 1-855-879-4332, or visit myidealdoctortelehealth.com.

Breathing Better with Asthma

Asthma makes it hard for you to breathe. It can affect your daily life if you don't take care of it. Medications do not cure asthma, but they can help make you feel better. Take them exactly as your primary care provider has prescribed. That means taking them the right way at the right time!

Here are tips to remind you to take your asthma medication and help you get into a routine:

- Keep it near your bed so you see it when you wake up.
- Take it before you brush your teeth.
- Have your family or a friend call to remind you each day.
- Put sticky notes where you'll see them to remind you to take your inhaler when you leave the house.
- Use a weekly pillbox.
- Set your phone or other alarm.
- Mark your calendar to refill your prescription one week before it runs out.

National Prescription Drug Take Back Day

Prescription drugs can be an important part of your treatment. They can help you with an illness. They can stabilize you in a health emergency. They are helpful tools when used correctly. Drugs that are misused or in the wrong hands can lead to harm or death. That's why CareSource wants to remind you to safely get rid of any unused or expired drugs.

The National Prescription Drug Take Back Day is **October 24, 2020**. This is your chance to clear out drugs that have expired or that you are no longer taking. To learn more or to find drug collection sites year-round, visit takebackday.dea.gov.

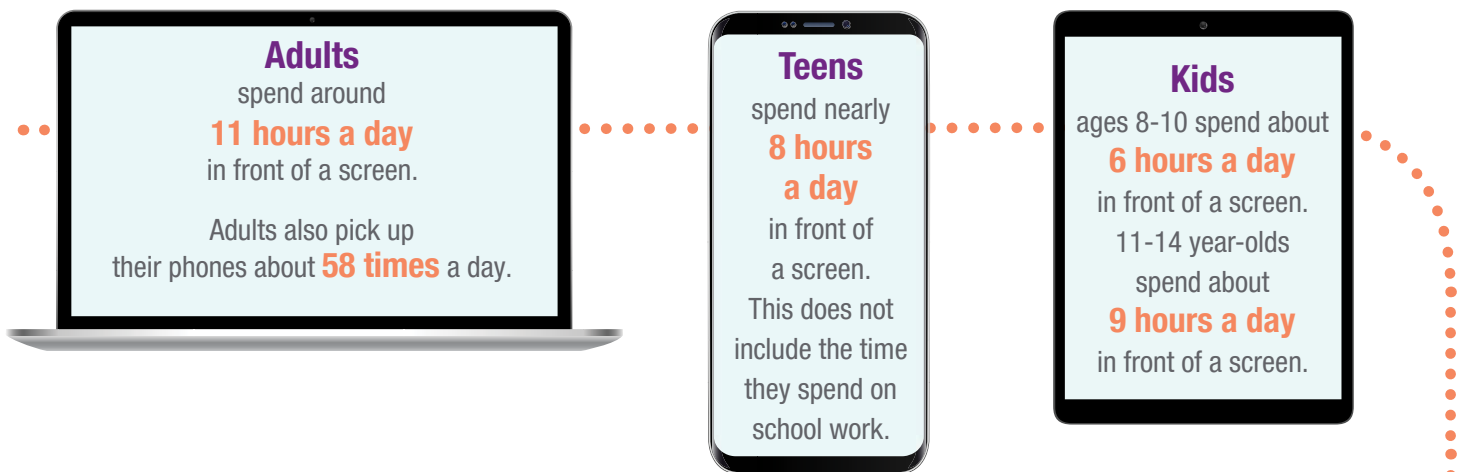

Screen Time and **YOUR HEALTH**

With the recent stay-at-home orders, many of us binge-watched TV shows and “video-chatted” family and friends. We spent more time than usual looking at our screens! Too much screen time can be harmful to our health.

How Much Screen Time Are We Getting?

How Does It Affect Our Health?

- It affects your brain
- It harms your eyesight
- It lowers your attention span
- It can harm your relationships
- It can cause obesity
- It can disrupt your sleep

How Can We Reduce Screen Time?

There are many ways to reduce screen time.

Say **NO** to all screens:

- During meals
- An hour before bed
- In the bathroom

Say **YES** to:

- Reading a book
- Starting or renewing a hobby
- Getting plenty of exercise
- Spending time with friends

BREAST CANCER AWARENESS

Breast cancer is the second most common cancer among women in the United States. It is a disease in which cells in the breast grow out of control. White and black women get breast cancer at about the same rate, but black women die from breast cancer at a higher rate. Many things like family history or getting older can affect your risk for breast cancer. However, you can help lower your risk of breast cancer by taking care of your health in these ways:

Get regular exercise.

Maintain a healthy weight.

Don't drink alcohol, or limit it to no more than one drink per day.

If you can, breastfeed your child/children.

Stay informed and healthy to lower your risk of getting breast cancer. It will also increase your chances of living if you are diagnosed with it.

Protect Yourself from

COVID-19 SCAMS

Unease around COVID-19 has made fraud and scams more common. You should be on alert for things that don't seem right. Some of the scams to watch for are:

- People selling cures for COVID-19.
- Robocalls, sales calls, online posts, emails, or people going door-to-door who promise free hand sanitizer or testing kits if you give your Medicaid or Medicare number.
- Emails pretending to be from the World Health Organization or the CDC.
- Phony websites or apps that share news about COVID-19 so they can get into your phone, tablet, or computer.
- People asking for money for causes or charities that don't exist.
- Health care workers using patient information for COVID-19 testing and then billing for other tests.

Let us know if you suspect fraud or scams! Call CareSource Member Services and say that you'd like to report fraud. You will be routed to a private fraud hotline. You can call the hotline 24 hours a day.

You can also let us know about scams or fraud by:

Email: fraud@caresource.com

Mail: CareSource
Attn: Special Investigations Unit
P.O. Box 1940
Dayton, OH 45401-1940

Check Your Blood Pressure at Home and with Your **PCP**

Managing your blood pressure is great for your health. Uncontrolled blood pressure raises your risk of heart disease and stroke. It is important to see your primary care provider (PCP) regularly. Have your blood pressure checked at every visit.

Talk to your PCP about checking your blood pressure at home. CareSource may pay for a home blood pressure monitor.

Home blood pressure checks can help you keep tabs on your blood pressure. They can also make certain any lifestyle changes (like healthy eating and being active for 30 minutes every day) you have made are working.

Home checks can alert you and your PCP to possible health problems.

CareSource also offers a free Disease Management Program that can help you learn about your health and how to better manage your specific health condition. If you would like to learn more about blood pressure and you would like to opt-in to the Disease Management Program, please call **1-844-438-9498**.

Stress Less with CareSource and myStrength

Life can feel overwhelming at times. CareSource and myStrengthSM can help you through these tough times with self-guided tools to strengthen your mind, body, and spirit. myStrength offers:

- Empowerment activities like a mood tracker and a fitness log
- Articles and videos to learn about topics like anxiety, post-traumatic stress disorder (PTSD) and depression
- Daily inspirational quotes
- Help to stop smoking
- Mindfulness exercises
- Parenting tips and help managing stress
- And much more!

Your emotional health is important. That's why CareSource offers myStrength online or through a mobile app at no cost to you.

- 1 Visit **bh.mystrength.com/caresource** and click **Sign-Up**
- 2 Complete the sign-up process and your personal profile
- 3 Download the app on your phone at **mystrength.com/mobile**

Take control of your well-being and
start living your best life.

You deserve it!

LOOK...

Get Your Vision Checked

CareSource partners with Superior Vision® to offer routine eye care for our members. Services include:

- Routine eye exam
- Corrective lenses, frames, or contacts

Superior Health, a Versant Health company, has a large provider network in Ohio. This means making an appointment is easy.

Please make sure your eye care provider is in the Superior Network. You should check this before you make an appointment. Visit **FindADoctor.CareSource.com** to use the Find a Doctor online tool. You can also call Member Services at the number on the back of this newsletter to learn more.

Stamp of Approval

There are times when CareSource must pre-approve some services or medications before you get them. We call this prior authorization (PA). This means that your provider must get approval from us. They must do this before they can give you certain services. They will know how to do this. They need to talk to us before you get services from them.

You may have to pay for services if your provider does not get a PA. Some things that require a PA are:

- Seeing an out-of-network provider (except in emergencies)
- Getting services not covered by CareSource
- Some prescriptions (such as specialty drugs)

Visit **CareSource.com** to learn more about what needs a PA. You can also find the PA list in your **MyCareSource.com** account. Or you can call the toll-free phone number on your ID card and speak with Member Services. We are here to help you get the care you need, when you need it.

DID YOU KNOW?

It's important to get a **flu shot** every year:

The flu viruses from last flu season will be different from the flu this season, because the virus changes each year. You need a new shot every year to protect yourself.

Spotlight on CareSource JobConnect

As a CareSource member, you can opt-in to CareSource JobConnect™ at no cost to you. This program can pave the way from where you are to where you want to be.

Through JobConnect, you will be paired with a Life Coach. Your Life Coach will make sure that you are “job-ready” by helping you solve barriers to employment. This can involve finding child care, housing, and/or transportation. Your Life Coach can even help you connect with local employers.

CareSource JobConnect can also help you find success in other ways:

Education and Training

- Earning your GED
- Enrolling in college or a certification program

Job Skills

- Resume writing
- Interview practice

Community Support

- Food access
- Legal aide
