

WINTER 2019

# MEMBER *Source*

A Newsletter for CareSource Members

## CareSource Covers You With Care

At CareSource, our members are our top priority. And did you know...that CareSource is the most chosen Medicaid plan in Ohio. In fact, more people choose CareSource than all the other health plans combined.

Being a CareSource member has many advantages. They include:

- **No copays.**
- **Large health care provider network** with thousands of primary care providers and specialists.
- **CareSource24<sup>®</sup>, our Nurse Advice Line**, with caring, registered nurses that listen to your symptoms or concerns and help you decide what to do and where to get care.
- **Transportation** to approved health care visits and Medicaid redetermination appointments.
- **Dental and vision care** including checkups, teeth cleaning and a large selection of eye glasses.
- **Rewards and incentives programs** – including Babies First<sup>®</sup> (for pregnant moms and babies), Kids First (for children ages 18 months to 18 years) and Women First (for adult females).
- **Free mobile app** to help you find a doctor, access your member ID card on the go and more.
- **Care management** for chronic health conditions.
- **And much more.**

At CareSource, your health comes first. We focus on you to provide health care with heart.

To learn more call Member Services at **1-800-488-0134** (TTY: 1-800-750-0750). We are open from 7 a.m. to 7 p.m. Monday through Friday and are here to help.

 **CareSource<sup>®</sup>**

# Are E-cigarettes Really a Healthier Option?

E-cigarettes also known as “vaping” are electronic smoking systems. They have units filled with a fluid that contains nicotine and flavorings, and can contain tetrahydrocannabinol (THC), and cannabinoid (CBD) oils. The fluid is heated into a vapor, which the person breathes in. That’s why using e-cigarettes is called “vaping.”

Because vaping is new, we don’t yet know how it affects the body over time. The Centers for Disease Control (CDC), U.S. Food and Drug Administration (FDA), state and local health departments, and other clinical and public health partners are investigating a multistate outbreak of lung injury linked with e-cigarette product use, or vaping.

## Symptoms of Lung Injury Reported by Some Patients in This Outbreak

- ✔ cough, shortness of breath, or chest pain.
- ✔ nausea, vomiting, or diarrhea.
- ✔ fatigue, fever, or abdominal pain.

Patients said that their symptoms showed over a few days to weeks. A lung infection does not appear to be causing the symptoms.

## What We Know

- 805\* lung injury cases from 46 states and 1 U.S. territory.
- 12 deaths have been confirmed in 10 states.

\*The increase in lung injury cases from last week represents both new patients and recent reporting of previously identified patients to CDC.

CDC has received sex and age data on 771 patients.

- About 69% are male.
- 62% are 18 to 34 years old.
- 22% are between 18-21.
- 16% are under 18 years.

Findings show that products with THC play a role in the outbreak. Among 514 patients:

- 77% are using THC-containing products; 36% are only using THC products.
- About 57% are using nicotine-containing products; 16% are only using nicotine products.

## What We Don't Know

- The specific chemical exposure(s) causing lung injuries from e-cigarette product use, or vaping, still is unknown at this time.
- No single product or substance has been linked to all lung injury cases.
- More information is needed to know whether one or more e-cigarette or vaping products, substances, or brand is responsible for the outbreak.

## Recommendations:

- You should refrain from using e-cigarette, or vaping products, especially THC-containing.
- If you are an adult who used e-cigarettes containing nicotine to quit cigarette smoking, do not return to smoking cigarettes.
- If you use e-cigarette, or vaping products, do not buy these products (e.g., e-cigarette or vaping products with THC or CBD oils) off the street. Do not modify or add any substances to these products that are not created by the manufacturer.
- If you have recently used an e-cigarette, or vaping product and have symptoms like those reported above, see your primary care provider.

The CDC continues to work closely with FDA, states, public health partners and clinicians on this outbreak. If you have any questions or would like more information, please call Member Services at **1-800-488-0134** (TTY: 1-800-750-0750 or 711).

## Can't get in to see your PCP? *Try Telemedicine Instead!*

Finding time to visit your primary care provider (PCP) can be a challenge at times. Telemedicine can ease these challenges in a variety of ways! Telemedicine uses your computer or smart phone to deliver health care services without an in-person visit to your PCP. It can be used any time, day or night.

MYidealDOCTOR® is your telemedicine provider and is available 24/7/365. MYidealDOCTOR is a great option for things like infections, rashes, allergies, coughs and more. Nearly any service you can get at an urgent care clinic, you can also get through MYidealDOCTOR.

### Why Use Telemedicine?

1. Travel to distant PCPs is not necessary when telemedicine is used. That means you can save the cost of travel and expenses to get to a specialist.
2. The danger of traveling in winter weather is removed.
3. You do not need to take days off work to see their PCP or to take their children.
4. Children miss less school when they can be seen via Telemedicine.
5. You can receive care instead of not getting treatment to save time or money.

Visit [www.myidealdoctor.com](http://www.myidealdoctor.com) | Call 1-855-879-4332

Download the MYidealDOCTOR app to your smart phone.

## GET YOUR FLU SHOT — It's not too late!

Did you know the flu season can last from October all the way to May? The CDC recommends that getting your flu vaccine in January or later can still be beneficial. Talk with your PCP or pharmacist about getting your free flu vaccine today. They may also be able to recommend other vaccines to help keep you healthy!

# Here's Something to Smile About!

## Easy and Convenient Dental Care at School

The Ohio Dental Outreach mobile dental clinic program may be coming to your child's school. This can help make it easy for your child\* to get his or her annual dental visit while at school.

### We make it easy for you!

- ✓ No rides needed
- ✓ No time away from work
- ✓ Dental work is done during school hours
- ✓ Dentists can:
  - ✓ Check and clean teeth
  - ✓ Take x-rays
  - ✓ Fill cavities
  - ✓ Place sealants (help prevent cavities)

\*Only kids ages 3 to 13 can take part in this program.

To learn more, call Member Services at **1-800-488-0134** (TTY: 1-800-750-0750 or 711).

We are open from 7 a.m. to 7 p.m. Monday through Friday.

## 5 Steps to Wash Your Hands the RIGHT Way

**WET** your hands with clean, running water (warm or cold), turn off the tap, and apply soap.

**LATHER** your hands by rubbing them together with the soap. Lather the backs of your hands, between your fingers, and under your nails.

**SCRUB** your hands for at least 20 seconds. Need a timer? Hum the "Happy Birthday" song from beginning to end twice.

**RINSE** your hands well under clean, running water.

**DRY** your hands using a clean towel or air dry them.

# The Time is Now – Know the Facts. Get Tested.

Being tested for certain diseases is an important part of your health care. Learn about Hepatitis C and HIV, to find out if you should be tested.

## 4 MILLION

Americans are living with **Hepatitis C**

**Contracted through blood products-**  
sharing needles, injecting drugs,  
received a blood transfusion between  
the 1970's or 1980's

**Most show no  
symptoms-**  
or mistake  
symptoms for the flu

**Three quarters of Americans born between 1945-1965 have Hepatitis C.**  
Talk to your health care provider about a blood test for Hepatitis C.

According to CDC,  
Americans are infected with **HIV** each year.

## 50,000

**HIV is a virus that  
weakens your immune  
system** and makes it easier  
for you to get infections.

### IMMUNE SYSTEM

**It is treatable  
through  
medication.**

**If you are between the ages of 15 – 65 and are sexually active,**  
it is recommended that you are tested for HIV.

If you would like to learn more about HIV or Hepatitis C, please call CareSource at **1-844-438-9498**.

# Diabetes and Nerve Damage

## – Keep Your Feet Healthy

If you have diabetes, you are likely to also have neuropathy or nerve damage. This can happen to any part of your body, but the nerves in your feet are most often affected. If you have nerve damage, your symptoms might include numbness, tingling or pain, or you might show no symptoms at all. You may also find that your ability to feel pain, heat, or cold is lower than before.

You can keep your feet healthy by checking them every day. If you notice any changes in the shape or color of your feet, or how they feel (for example, become numb or hurts) you should let your health care provider know.

Make sure your health care provider checks your feet at least once a year. Because people with diabetes are more prone to foot problems, a foot care specialist (podiatrist) may be on your health care team. CareSource may also cover you to have a pair of diabetic shoes - talk to your health care provider.

If you would like to learn about proper foot care, please call us at **1-844-438-9498** (TTY: 1-800-750-0750 or 711).

Source: Centers for Disease Control and Prevention

## Don't let COPD Slow You Down

Chronic obstructive pulmonary disease (COPD) is a long-term lung disease that makes it hard to breathe. The disease is becoming more common, affecting millions of Americans. It is the third leading cause of disease-related death in the U.S.

The good news is COPD is treatable. Work with your health care provider to make a plan that is right for you. With a plan, you will know how and when to take your medications, when to call your health care provider and when to get emergency care. A management plan will help you track how you are doing, any concerns you may have, and any changes in your health that are important to discuss with your health care provider.

# Detecting Fraud, Waste and Abuse – It's About More Than Money

Billions of dollars are spent on fraudulent and hurtful practices each year within the health care system. However, health care fraud, waste and abuse is about much more than money – it's about quality of care. Examples include a provider giving services or prescribing medications that are not needed. This could put your care and health at risk by exposing you to inappropriate care. Your well-being is our top priority, so we take these notices very seriously.

If something doesn't feel right or you suspect a provider is performing services they shouldn't, call Member Services at **1-800-488-0134** (TTY: 1-800-750-0750 or 711).

## Drug List Updates

Prescription drugs can be an important part of your recovery. CareSource has a searchable drug list that is updated monthly on our website. Use *Find My Prescriptions* link under *Quick Links* to find the medicines covered under your plan. You can also call Member Services to get help finding out if a medicine is covered and its cost to you.

## Take Care of Your Teeth and **They'll Take Care of You**

Daily brushing and flossing isn't just about fresh breath and a good looking smile. The mouth is the first stop to a healthy body. That's why routine exams and cleanings covered by your plan are very important. Take a look at these 14 disease and health conditions you can help prevent by caring for your teeth.

- 1. Heart Disease:** Includes conditions such as coronary heart disease, congenital heart disease, heart attack, and congestive heart failure.
- 2. Clogged Arteries:** A buildup of plaque on the inner walls of the arteries. Arterial plaque reduces blood flow or can block altogether.
- 3. Stroke:** A stoppage of blood flow to the brain, causing brain tissue to die.
- 4. Tooth Loss:** The loss of teeth due to gum disease and tooth decay.
- 5. Respiratory Disease:** Includes disorders affecting the lungs such as asthma, chronic obstructive pulmonary disease, infections, lung cancer, and many other breathing problems.
- 6. Severe Gum Disease:** An infection of the tissues and bones that surround and support the teeth.
- 7. Ludwig's Angina:** A bacterial infection of the floor of the mouth.
- 8. Endocarditis:** An inflammation in your heart's inner lining.
- 9. Brain Abscess:** A collection of immune cells, puss, and other materials in the brain, usually from a bacterial or fungal infection.

# MAMMOGRAMS HAVE REDUCED BREAST CANCER DEATHS BY UP TO

# 40%

## SINCE 1990.

Talk to your primary care provider (PCP) about breast cancer and if you should be tested.

Source: American Cancer Society, Cancer Journal Entry

**10. Mediastinitis:** An inflammation of the mediastinum. This area contains the heart, large blood vessels, windpipe, esophagus, thymus gland, lymph nodes and connective tissues.

**11. Osteomyelitis of the Jaw:** An acute or chronic infection of the jaw bone.

**12. Facial Cellulitis:** A bacterial skin infection of the face.

**13. Pneumonia:** An inflammation of the lung that involves fluid filling the air sacs.

**14. Sepsis:** A overactive immune response to an infection that results in the formation of blood clots that block the flow of blood to vital organs.

### Possibly Affected By:

**Gum Disease (Gingivitis)**

**Tooth Abscesses**

## Express Scripts Pharmacy Innovation Partnership: January 1, 2020

CareSource wants to remind you about our new pharmacy innovation partner, Express Scripts. Beginning January 1, 2020, all medication claims will be processed by Express Scripts.

### Reminders:

- You should get a new CareSource member ID card in the mail. Bring your new card with you to doctors' appointments and to your pharmacy.
- For questions about which medications are covered, you can find the CareSource preferred drug list on **CareSource.com**. CareSource updates the drug list regularly. You can find the most recent list and the Find My Prescription tool on **CareSource.com** to look up the medications you take.
- You can also find a local pharmacy on **CareSource.com**. We have many pharmacies that accept CareSource. The list of participating pharmacies may change. If you need help finding a pharmacy, please visit **CareSource.com** or call Member Services.

Please read any letters you get in the mail and call CareSource if you have any questions.

## Where Should You Go?

What options do you have when you're unable to see your primary care provider (PCP) during normal business hours? Match the injury or illness to where you can be treated.

- |   |                               |
|---|-------------------------------|
| _____ 1. Sinus infection                    | A. Walk-in Convenience Clinic |
| _____ 2. Immunizations (shots)              | B. Urgent Care                |
| _____ 3. Sudden paralysis or slurred speech | C. Emergency Room (ER)        |
| _____ 4. Sprains and strains                | D. MYidealDOCTOR              |

CareSource24® is our Nurse Advice Line. Registered Nurses are available 24 hours a day 365 days a year. They will direct you to where you should go to be treated.

Answers: see back cover page

# Stay Warm, Stay Fit!

As the weather gets cold, we still have to move our bodies. Indoor exercise is a great way to stay healthy. Physical activity is the best tool to improve our health. Below are some fitness options to do indoors when it is cold outside:

- 1 Strength training at home
- 2 Walk laps at the mall
- 3 Community dance class
- 4 Cardio video at home
- 5 Resistance bands
- 6 Yoga
- 7 Take steps instead of elevator
- 8 Pilates
- 9 Cycling bike
- 10 Treadmill

## Holiday Schedule

In observance of major holidays, CareSource will be closed on the following days:

- Thanksgiving Day: Thursday, November 28, 2019
- The day after Thanksgiving: Friday, November 29, 2019
- Christmas Eve: Tuesday, December 24, 2019
- Christmas Day: Wednesday, December 25, 2019
- New Year's Day: Wednesday, January 1, 2020
- Memorial Day: Monday, May 25, 2020
- Independence Day (Observed): Friday, July 3, 2020
- Labor Day: Monday, September 7, 2020

# Care for Moms and Babies

Are you thinking about getting pregnant? Expecting a baby soon? Already a mom? Here are some tips to help you and your baby stay healthy.

## Before you are pregnant

- If you think you might be pregnant, don't wait. Call your doctor right away to schedule a visit.

## While you are pregnant

- Your doctor will schedule many checkups for you over the course of your pregnancy. Don't miss any. They are all important.
- Follow your doctor's advice. Ask questions if you are not sure what to do. Your doctor and our nurse advice line are here to help.
- Sign up for Babies First®. Learn more at [CareSource.com/ohbabiesfirst](https://www.caresource.com/ohbabiesfirst).
- Don't smoke. If you do, try to quit. Smoking can cause serious harm to you and your baby. We can help you find a path to success. You can:
  - Get stop-smoking tips and resources at the MyHealth link on your My CareSource account.
  - Get coaching through our Tobacco Free program. Access this through the MyHealth link, too.
  - Call **1-855-852-7001**. Learn about our Quit for Two program for pregnant members.

## After the baby is born

- Schedule a postpartum (after birth) visit to see your doctor. You should go between three and eight weeks after you deliver. This visit helps make sure you are recovering well. It gives you a chance to ask your doctor any questions you may have.
- Take your baby to the doctor for well-child exams.

# CareSource JobConnect Helps Set You Up For Success!

CareSource knows that for some of us, reaching life goals like getting a better job may seem out of reach because life gets in the way. CareSource JobConnect™ helps remove the things that keep you from reaching your goals and dreams. As a CareSource member, we can help you find services and support at no cost!

Some of these services are:

- Professional development
- Community support
- Access to food care
- Legal aid
- Budgeting and personal finance
- Housing resources

By taking part in the CareSource JobConnect program, you will get one-on-one coaching, support in finding work or educational opportunities, and a path to finding support that will give you the best chance at success.

To join the CareSource JobConnect Program you must be a CareSource member or a parent or guardian of a CareSource member, and be at least 14 years of age.

To learn more:

- Call us at **1-844-543-7378** or
- Email us at [lifeservices@caresource.com](mailto:lifeservices@caresource.com)

## Tips to Reduce Holiday Stress

Don't let the holidays become something you dread. With a little planning, you can find peace and joy during the holidays.

- 1 Be realistic.** As families change, traditions change as well. Be open to making new ones.
- 2 Stick to a budget.** Before you go shopping, decide how much money to spend. Or make homemade gifts.
- 3 Learn to say no.** Don't stretch yourself too thin by trying to do everything.
- 4 Don't stop healthy habits.** Try to choose healthy meals, and get plenty of sleep and exercise.
- 5 Seek help if you need it.** You may find yourself feeling sad, anxious or not yourself. If these feelings last for a while, talk to your doctor.

**Answers:** 1D, 2A, 3C, 4B
