## Don't Forget!

### MYidealDOCTOR® is ready to help any time!

Gathering indoors with large groups is a great way to socialize, but also a great way to spread germs. If you catch a bug, or have another non-emergency medical issue but can't get to your primary care provider (PCP), call MYidealDOCTOR any time day or night, 365 days a year.

You can call from work or home. Consult with a doctor in minutes. If needed, a prescription can be sent to the network pharmacy of your choice.

MYidealDOCTOR treats many conditions over the phone or computer, such as:

- coughs/colds/flu
- allergies/sinus
- minor injuries
- minor infections
- sore throat/fever
- rashes
- and more

Feel better faster, with MYidealDOCTOR! Use the CareSource App to connect, call 1-855-879-4332, or visit MYidealDOCTOR.com.

*MYidealDOCTOR should NOT be used for trauma, chest pain, shortness of breath, bleeding, or prescribing Drug Enforcement Agency (DEA) controlled substances.*

# Are You at Risk for **Prediabetes?**

**One** out of every **three** adults in the United States has prediabetes.

Prediabetes means your blood glucose (sugar) levels are higher than normal but not high enough to be diagnosed as diabetes. People with prediabetes have up to a 50 percent chance of having diabetes in the next 5 to 10 years.

Ask your health care provider if you should be tested for prediabetes. One test for prediabetes is the Hemoglobin A1C test. It shows your average blood sugar level for the past 2 to 3 months. If the results are normal, you should be retested at least every three years.

## Four Ways to Report Fraud, Waste and Abuse

To anonymously report any fraud, waste and abuse cases:

- ① Call **1-800-488-0134** (TTY: 1-800-750-0750 or 711) and follow the steps to report fraud.
- ② Write to us. You can fill out the Fraud, Waste and Abuse Reporting Form found at **CareSource.com/members/tools-resources/fraud-waste-abuse/**. You can also send a letter to us at:

CareSource  
Attn: Special Investigations Unit  
P.O. Box 1940  
Dayton, OH 45401-1940

Other ways to report that are not anonymous include:

- ③ Fax us at **1-800-418-0248**
- ④ Email a message to [fraud@CareSource.com](mailto:fraud@CareSource.com)

Go to **Caresource.Com** to learn about what types of activities are considered fraud, waste and abuse.

Lifestyle changes can help you be your healthiest. Consider eating healthier foods and being active for 30 minutes or more on most days.

## Healthy Habits to Add to Your Daily Routine

Getting more activity in your life can seem hard. Here are some easy ways to add more physical activity to your daily life:

### Find 10 minutes.

10 minutes here and there goes a long way. Try parking in the farthest spot from where you are going. Try taking the elevator only after you have taken the stairs as far as you can go. Think of ways to get in more activity as you go about your daily life.

### Make it a family affair.

Get your family moving with you! Run around the yard, dance around the house, vacuum or dust to music – just get moving!

Most importantly, think progress, not perfection. Changing your lifestyle is not all-or-nothing. It is about making healthier decisions each day, and starting again when you get off track.

# Health and Wellness Programs

Thank you for being a member of our health plan. Our mission is to make a lasting difference in our members' lives by improving their health and well-being. CareSource has programs that can help you reach your best health.

CareSource may sign you up in these programs. We do that based on news we get from your doctor, pharmacy, or other health care source. That is why you may get materials sent to you by CareSource. We may also call you about these FREE programs. You can also call CareSource and ask to sign up. We want to help you with your health.

Programs include:

- **One to One Care Coordination** – helps members with chronic illness and functional impairments, multiple co-morbidities or at-risk pregnancies. It may include face-to-face visits, telephonic interactions, electronic communications, mailings, and health partner collaboration.
- **MyHealth Journeys** – encourages members to use CareSource online tools that encourage lifestyle habits. This includes things such as eating healthy, being physically active, and proactively managing chronic conditions.
- **Tobacco Free** – uses telephonic coaching to encourage non-pregnant members to opt-in to a tobacco cessation program. The program focuses on topics like nicotine dependence, benefits of quitting, and medications that help a person quit.
- **Health Coaching** – A telephonic program focused on disease-specific education for members with diabetes, asthma, and hypertension.
- **myStrength<sup>SM</sup> Tool** – offers a FREE online self-management tool to connect members with resources to improve behavioral health and overall well-being.

To learn more call 1-844-438-9498.

## Don't Miss This or Your Next Dose

Long-term medications, like those for high blood pressure or diabetes, keep you healthy. CareSource wants to make refilling them easier.

### Helpful ways to remember to refill your drugs:

Refill reminders from your pharmacy. Some pharmacies will **call or text you**.

Set up **automatic refills** for your drugs. Ask your pharmacy to set this up.

Have your pharmacy **synchronize your long-term medications**. You won't have to visit them as often.

Sign up for **mail order** or **90-day supplies**. Check your Member Handbook to see if you are eligible.

Don't forget to talk to your doctor and pharmacist often. They can answer your questions, explain if you miss a dose, and how to manage side effects.

## It's a new year!

### Have you scheduled your FREE Annual Wellness Visit?

Don't forget to see your primary care provider (PCP) at least once every 12 months. During this visit, your PCP will review your personal and family health history, your current medications, health concerns or changes since last visit and health screenings you should complete.

Not sure if you have a provider? Call Member Services at **1-800-488-0134** (TTY: 711).

### CareSource24<sup>®</sup> Nurse Advice Line

Our staff of knowledgeable, caring registered nurses are here 24/7 to talk to you and offer advice about your injury, illness, or to answer your health questions. We can help you decide when self-care, a doctor's visit, urgent care, or the emergency room (ER) is necessary.

Call **1-866-206-0554** (TTY: 1-800-750-0750 or 711) to learn more.

# Seven Steps to Stay Healthy with a Chronic Disease

**1. Stop smoking:** Talk to your primary care provider (PCP) about your options to lower your risk of serious health problems.

**3. Get active:** Take a brisk walk for at least 30 minutes a day.

**2. Start healthy eating habits:** eat a well-balanced diet of fruits, veggies, whole grains, lean meats, and low-fat dairy products.

**4. Sleep:** Aim to get at least seven hours of sleep each night.

## Your Options for Care

The emergency room is a must for serious emergencies such as heart attacks, stroke, trouble breathing and more. It's important to be aware, and take advantage, of other options available to you. We want to ensure you get the right care at the right cost for your conditions.

Option:	Availability:	Best for:
CareSource24®, Nurse Advice Line	24 hours a day, 365 days a year	Advice for next steps for illness or injury
MYidealDOCTOR®	24/7/365	Rashes, allergies, coughs, sore throats
Primary Care Provider (PCP)	Business hours	Routine care, illnesses, advice
Convenience Care Clinic	Store hours	Sinus, colds, shots
Urgent Care	Some open 24/7/365	Illnesses, breaks, wounds
Emergency Room	24/7/365	Heart attack, stroke, trouble breathing

## What are Statins?

Statins (atorvastatin, lovastatin, pravastatin, and simvastatin) lower cholesterol by blocking how much cholesterol your body makes. This prevents cholesterol from building up in arteries and causing problems.

**5. Limit alcohol intake:** For women - one drink per day. For men - up to two drinks per day.

**7. Get your numbers in check:** Knowing your Body Mass Index (BMI), A1C, cholesterol and blood pressure are important to your health. Discuss with your PCP to help lower your risk for heart disease and stroke.

**6. Complete your preventive screenings:**

Get regular preventive health screens, like having a mammogram, colorectal screening, prostate screening and cervical cancer screening.

**FACT:** Members with a chronic disease have a higher risk of getting the flu. Stay up to date and get your flu shot today!

## Fun Flu Shot Facts

**Did You Know:** The sooner you get a flu shot the sooner you are protected? It can take two weeks for full effect. Ask your doctor or pharmacist when flu shots will be available.

# Use myStrength<sup>SM</sup> to **FINALLY KICK SMOKING!**

Cigarette smoking is the leading cause of avoidable deaths in the U.S. Vaping and e-cigarette use has quickly increased among youth. Nearly seven out of 10 smokers want to break the habit but do not know how to start. CareSource and myStrength can help you become smoke free.

Log onto your MyCareSource account and click on the link for myStrength. You will have access to proven methods to help overcome your addiction with cigarettes and e-cigarettes. Think about how freeing it would be to finally become a non-smoker!

## Ready to start using myStrength?

1. Visit [bh.mystrength.com/CareSource](https://bh.mystrength.com/CareSource) and click "Sign-Up."
2. Complete the myStrength sign-up process and personal profile.
3. Go mobile! Download the myStrength app for iOS and Android phones at [mystrength.com/mobile](https://mystrength.com/mobile) and SIGN IN using your login email and password.

## Pharmacy Updates

CareSource has a searchable drug list that is updated monthly on the website. To find out which drugs are covered under your plan, go to the **Find My Prescriptions** link under Member Tools & Resources. The most current updates can be found there also. If you do not have access to the internet, you can call Member Services at **1-800-488-0134** (TTY: 1-800-750-0750 or 711). A CareSource representative will help you find out if a medication is covered and how much it will cost.

## Drug Take Back Day

Prescription drugs can help you with an illness or can stabilize a health emergency. But drugs that have expired, are misused or get into the wrong hands can lead to harm or death.

Don't keep unused medications in your home. National Prescription Drug Take Back Day is **April 25, 2020**. To find drug collection sites, visit [takebackday.dea.gov](https://takebackday.dea.gov). It is a safe, convenient and responsible way to get rid of unused or expired medications.

# Helpful Tips for Your Asthma Triggers

Here are a few tips to help control springtime asthma or COPD triggers, like pollen, air pollution and temperature changes:

- Know the pollen count. Check your local weather forecast or the National Allergy Bureau website to get daily pollen and mold types. Stay indoors during high counts.
- Use your preventive or controller medications as prescribed, even if you are feeling well. If you have quick-relief medicine, keep it nearby in case of a flare-up.
- Use a peak flow meter.
- Make a written Asthma Action Plan.

Talk with your primary care provider (PCP) if you begin having trouble controlling your asthma or allergy symptoms. Your PCP can help you recognize what makes your asthma worse, and help find solutions to reduce and avoid asthma triggers.

## What is **Health Care Quality**?

Quality is a word you often hear when people talk about health care. But, what does 'quality' health care really mean? Quality is how good something is considered. High quality in health care means CareSource always wants to be sure that you:

**1** Get the right care

**2** At the right time

**3** From the right medical expert.

CareSource employs people to ensure that your doctors, nurses and hospitals give you the best quality care available!

# Lead Poisoning: Know the Facts!

Lead is most harmful to children under six. Their growing bodies absorb lead easily. There is **no** safe lead level in a child's blood. Long-term health problems and even death can result from lead poisoning. A blood test can tell if your child has been exposed. This can be done at age one and again at age two. Talk to your child's primary care provider (PCP) about the test.

Lead poisoning can also be risky to a baby during pregnancy. If mom has been exposed to lead, she is at a bigger risk for miscarriage, stillbirth, early delivery and low birth weight. If you are pregnant and have questions about lead, talk to your PCP.
