Notice Date: December 15, 2021
To: Ohio Medicaid Providers
From: CareSource
Subject: COVID-19: Vaccine Administration Billing Guidelines Update

Summary

CareSource has received an update from the Ohio Department of Medicaid (ODM) regarding the billing guidelines for COVID-19 vaccine administration.

Providers of vaccine administration must enroll as an Ohio Medicaid provider to receive payment from ODM programs. Providers can access the [enrollment application](#) at the ODM portal.

ODM has reminded providers that COVID-19 vaccine administration coverage is similar to existing vaccine administration services billed to Medicaid. Because the federal government covers the full cost of the COVID-19 vaccine, providers will not receive Medicaid payment for it. Once Medicare payment has been satisfied, ODM will reimburse for the vaccine.

As a reminder, Medicaid fee-for-service and managed care plans will cover vaccine administration services with no cost-sharing responsibility for covered individuals. Vaccine administration must be billed to the managed care plan (CareSource) for members enrolled in managed care.

Please visit ODM's [COVID-19 billing website](#) for more information.
