Notice Date:	January 24, 2018
То:	Ohio Medicaid Health Partners
From:	CareSource [®]
Subject:	Reminder to Include Gestational Age on Delivery Claims
Effective Date:	March 1, 2017

As a reminder, effective Mar. 1, 2017, the Ohio Department of Medicaid (ODM) and CareSource began requiring that health partners include the gestational age on childbirth delivery claims. To receive payment, health partners must include the appropriate ICD-10 diagnosis code for the mother's weeks of gestation on claims submitted to CareSource.

For more detailed information about the claim guidelines and appropriate ICD-10 codes, please refer to the guidance from ODM – "Child Birth Delivery Procedures and ICD-10 Diagnosis Codes Required on Claims for Mother's Weeks of Gestation of Pregnancy." The ODM guidance is attached to this notification for easy reference.

Professional, Outpatient and Institutional Providers that Bill for Child Birth Delivery

> Description

Effective March 1, 2017, the Ohio Department of Medicaid (ODM) and Medicaid managed care plans (MCPs) will change the edit for the inclusion of weeks of gestation on childbirth delivery claims from "post and pay" to "deny". This means that in order to receive payment, providers must include the appropriate ICD-10 diagnosis code for the mother's weeks of gestation on claims submitted to ODM and MCPs. As outlined in the table below, there are several ICD-10 diagnosis codes indicating the weeks of gestation of the pregnancy. This billing requirement became effective with the ICD-10 compliance date of 10/1/15.

On professional claims, the CPT procedure codes must be tied to appropriate ICD-10 diagnosis codes as shown below. Diagnosis code validation edits on professional claims are based on detail-level diagnosis pointers and the 5010 X12 837P standard only allows up to four diagnoses to be pointed to per detail. If the weeks of gestation code is missing or not pointed to on one of the four diagnosis pointer fields in the delivery detail of the claim, the delivery detail will deny. Examples of the detail-level diagnosis pointers are shown in the appendix to this document.

On inpatient and outpatient hospital claims, the weeks of gestation codes are not tied to the delivery procedure codes when submitted, but are required on childbirth delivery claims. If the weeks of gestation code is missing from the inpatient claim, the entire claim will deny. If the weeks of gestation code is missing from the outpatient claim, the delivery and all services provided on the same date as the delivery will deny.

The following table displays the ICD-10 diagnosis codes that must be accompanied with a delivery procedure code. To allow providers sufficient time to adjust to this ICD-10 billing requirement, the system logic to enforce this billing guidance was set to "post and pay" starting 10/1/15, and will now be set to "deny" for dates of service (outpatient and professional claims) or dates of discharge (institutional claims) on or after 3/1/17.
