

Ohio Medicaid and MyCare Behavioral Health Outpatient Hospital Benefit Grid

These benefits are effective for Ohio MyCare and Ohio Medicaid on January 1, 2019.
MyCare full opt in - Medicare primary and Medicaid secondary.

NOTE: This billing grid is specific to the facility billing for outpatient hospital benefits. In the situation where the hospital chooses to keep their 84/95 certification and be a "fully functional" CBHC they must follow everything all the CBHC's must follow per the BH Redesign provider manual including billing on the professional claim form, affiliating all of their rendering providers, etc. and will refer to the POS located in the Ohio CBHC Benefit Grid.

NOTE: Applicable Modifiers for OPHBH Services Provided by Outpatient Hospitals see tab "Provider Type Modifiers" Tab

NOTE: Attending prescriber NPI needs to be included on the facility claim form with the appropriate modifier to indicate level of practitioner providing the treatment on facility claim

| Code | Modifier | Description | Provider Type | Covered Y/N | Limits | Unit of Measure | PA | Additional Information |

| H2034 | HE | Clinically Managed Low Intensity Residential Treatment ASAM 3.1 Halfway house services for alcohol and chemical dependency provide a transitional living environment. These services are structured to promote sobriety and independent living and to assist with continued treatment. Patients are free to work or attend classes during the day and return to the facility at night. | Agency - NPI of rendering physician overseeing treatment in rendering field | Y | | Per Diem | Y | Up to 30 consecutive days without prior authorization. Prior authorization then must support the medical necessity of continued stay, if not, only the initial 30 consecutive days are reimbursed. Applies to first two stays; any stays after that would be subject to full prior authorization. |
| H0012 | HE + AM, TF HE + UC, TF HE + SA, TF HE + UD, TF | Alcohol and/or drug services: subacute detoxification (residential addiction program; inpatient) ASAM 3.2 Acute and subacute detoxification services in which the differentiating factor is the setting where the patient is monitored for the long-term symptoms associated with the withdrawal from alcohol and/or drugs. Subacute detoxification deals with severe symptoms, such as alcohol and drug cravings, that do not require immediate intervention. Acute detoxification services are those in which the patient is medically managed and stabilized on an inpatient hospitalization basis for severe withdrawal syndrome associated with the withdrawal from alcohol/drugs. Acute withdrawal begins within hours and includes severe physical and psychological symptoms that may require medical management with medications such as methadone. | Agency -- MD/DO CNS CNP PA | Y | | Per Diem | N | Residential addiction program inpatient |
| H2036 | HE | Clinically Managed Population Specific High Intensity Residential Treatment ASAM 3.3 Outpatient services for alcohol and chemical dependency are structured to promote sobriety and independent living and to assist with continued treatment. Outpatient services allow patients to present for prescribed treatments and therapy and to maintain an otherwise routine home life | Agency - NPI of rendering physician overseeing treatment in rendering field | Y | | Per Diem | Y | Up to 30 consecutive days without prior authorization. Prior authorization then must support the medical necessity of continued stay, if not, only the initial 30 consecutive days are reimbursed. Applies to first two stays; any stays after that would be subject to full prior authorization |
