| 90853 | HE | Group psychotherapy (other than of a multiple-family group) The psychiatric treatment provider conducts psychotherapy for a group of several patients in one session. Group dynamics are explored. Emotional and rational cognitive interactions between individual persons in the group are facilitated and observed. Personal dynamics of any individual patient may be discussed within the group setting. Processes that help patients move toward emotional healing and modification of thought and behavior are used, such as facilitating improved interpersonal exchanges, group support, and reminiscing. The group may be composed of patients with separate and distinct maladaptive disorders or persons sharing some facet of a disorder. This code should be used for group psychotherapy with other patients, and not members of the patients' families. | AM AH | Y | 22 | \$25.45 | | N | Group psychotherapy (52 minutes or less; other than of a multiple-family group) SUD physician rate |

| H0001 | HE | Alcohol and/or drug assessment -Per Hour -SUD This code reports provision of alcohol and/or drug assessment services. A psychiatrist, clinical psychologist, or other specialized health care professional or team of professionals generally provides drug and/or alcohol assessments. Protocols vary, but an assessment is systematic and thorough and addresses all aspects of a patient's encounters with alcohol and/or drugs. A detailed family, social, and legal history is usually solicited and components may be verified independent of the patient interview. Quantity and frequency of alcohol and/or drug use is documented. Physical manifestations associated with alcohol or drug use or abuse may be noted if present, such as depression, mania, anxiety, etc. A physical medical examination may be a component of the assessment. | U1, U9 UA, U7 | Y | 22 | \$77.22 | Per Hour | N | 2 hours per person per calendar year per billing provider. Does not count toward ASAM LOC benefit limit. |
