

## Network Notification

**Notice Date:** August 27, 2018  
**To:** Ohio Health Partners  
**From:** CareSource®  
**Subject:** Requirement of Medicaid Number  
**Effective Date:** January 1, 2019

---

The Ohio Department of Medicaid (ODM) now requires that all health care providers participating in Ohio Medicaid and MyCare Ohio have an active Medicaid number. Further, per ODM requirements effective January 1, 2019, Managed Care Plans (MCOs) such as CareSource, will not be able to pay Medicaid or MyCare provider claims if the provider does not have an active Medicaid ID number.

To meet this ODM requirement, CareSource is no longer onboarding new providers who do not have an active Medicaid number. Applications without a number will be returned, and the provider will be requested to resubmit their application with an active Medicaid number.

Starting January 1, 2019, having an active Medicaid number will be a requirement for all providers, new, and previously participating with CareSource, for claims payment.

Please contact CareSource Provider Services at 1-800-488-0134 with any questions.
