

2019 WEBINAR SCHEDULE

Learn More About:

Risk Adjustment Documentation and Coding

TO REGISTER:

Visit pulse8.webex.com.

For questions please email us at ProviderEngagement@Pulse8.com.

Each webinar includes a high-level overview of Risk Adjustment (RA), Condition Categories, and the role of the Provider and Support Personnel.

JANUARY	
22	24
8:30am 12:30pm	8:30am 12:30pm

Foundations of Risk Adjustment: Identifying Risk-Adjustable Conditions, and the Role of the Condition Category Coding to a Patient's Risk Score

This course includes a deep dive of Risk Adjustment and Hierarchical Condition Categories and covers ICD-10-CM Hierarchical Condition Coding for ACA Commercial, Medicare, and Medicaid Risk Adjustment models.

JULY	
23	25
8:30am 12:30pm	8:30am 12:30pm

The Most Prevalent Risk-Adjustable Condition: Diabetes and its Associated Manifestations

Improve your practice's submission of the most prevalent risk-adjustable condition and its associated manifestations. We will highlight documentation essentials for correctly coding juvenile onset diabetes, type I and II diabetes, secondary diabetes, and diabetes due to genetic defects or post procedure. Build upon the essentials to efficiently code for manifestations such as nephropathy, neuropathy, and retinopathy.

FEBRUARY	
19	21
8:30am 12:30pm	8:30am 12:30pm

Successful Gap Closure through Risk Adjustment Documentation and Coding

Discover how to identify coding and documentation gaps for ACA Commercial, Medicaid, and Medicare patients. We will also provide an in-depth demonstration of Pulse8's provider tools designed to identify open chronic condition and quality gaps at the member level.

AUGUST	
27	29
8:30am 12:30pm	8:30am 12:30pm

Delivering Risk-Adjustable Conditions in Gynecology, Pregnancy, Childbirth, and the Puerperium

Learn how to successfully identify obstetric and gynecologic conditions that are risk-adjustable. These conditions include gestational diabetes, high-risk pregnancies, childbirth, and female infertility.

MARCH	
19	21
8:30am 12:30pm	8:30am 12:30pm

The Ultimate Course on Successfully Identifying, Documenting, and Coding Risk Adjustable Chronic Conditions for the PCP

Become familiar with how to identify, document, and correctly code the most common risk-adjustable conditions seen by Internal Medicine, Primary Care Physicians, and Pediatricians in America for the ACA Commercial, Medicare, and Medicaid populations. Learn how to harmonize your annual wellness visit with the identification and examination of your patients' common and/or rare risk-adjustable conditions.

SEPTEMBER	
24	26
8:30am 12:30pm	8:30am 12:30pm

Diseases of the Circulatory System: Keep Your Pulse on Risk Adjustment Documentation and Coding for Cardiovascular Conditions

Learn about specific coding guidelines for the United States' leading cause of death — Cardiovascular disease. We will discuss documentation and coding for the most prevalent conditions including coronary heart disease, angina, heart failure, hypertension with heart disease, and acute myocardial infarction.

APRIL	
23	25
8:30am 12:30pm	8:30am 12:30pm

The Pediatric Population: Become a Poster Child for Ensuring Effective Identification of Risk-Adjustable Conditions

This course explores the most common conditions seen in pediatric populations. We will review specific coding guidelines and quality metric reporting for childhood asthma, diabetes, obesity, autism, and more.

OCTOBER	
22	24
8:30am 12:30pm	8:30am 12:30pm

Just Breathe: The Ins and Outs of Proper Documentation and Coding for Diseases of the Respiratory System

This course provides in-depth insight into proper documentation and coding for chronic obstructive pulmonary disease, asthma, emphysema, and other common respiratory disease processes.

MAY	
21	23
8:30am 12:30pm	8:30am 12:30pm

Behavioral Health: Coding for Mental Health and Substance Abuse in America

Primary care physicians have been placed at the forefront of evaluation and management of mental and behavioral health disorders. Please join us while we focus on conditions that are due to psychoactive substance use and subcategories that cover schizophrenia, bipolar, and major depressive disorders.

NOVEMBER	
12	14
8:30am 12:30pm	8:30am 12:30pm

Rise to the Challenge: Coding for Metastatic Cancer

Discover the challenges of correctly coding the most common benign and malignant cancers. We will highlight metastatic diseases that accompany neoplasms that providers are assessing and treating daily.

JUNE	
25	27
8:30am 12:30pm	8:30am 12:30pm

The Brains Behind Accurate ICD-10-CM Coding for Neurologic Conditions

Join us while we discuss accurate documentation and coding for diseases of the central and peripheral nervous systems. Epilepsy, generalized seizure disorders, chronic and acute pain, migraines, Alzheimer's disease, and other dementias are just a few of the significant and impactful diseases we will be discussing.

DECEMBER	
17	19
8:30am 12:30pm	8:30am 12:30pm

Kidney Disease: Filtering through the Guidelines for the Correct Documentation and Coding of the Stages, ESRD, and Transplants

Join us for a deep dive into correct coding and documentation of the stages of chronic kidney disease (CKD) through End State Renal Disease (ESRD), kidney transplant status, dialysis, and the many conditions that may arise from CKD such as hypertension, congestive heart failure, and anemia.
