

PHARMACY POLICY STATEMENT

Arkansas PASSE

DRUG NAME	Myalept (metreleptin)
BILLING CODE	Must use valid NDC
BENEFIT TYPE	Pharmacy
SITE OF SERVICE ALLOWED	Home
STATUS	Prior Authorization Required

Metreleptin was approved in 2014 to treat the complications of leptin deficiency in patients with congenital or acquired generalized lipodystrophy. The defining feature of lipodystrophy is the selective loss of subcutaneous adipose tissue. Leptin is a hormone secreted by adipose tissue that informs the brain of the status of energy stores in the body. The leptin deficiency resulting from adipose tissue loss contributes to metabolic abnormalities. The replacement of leptin with metreleptin, which mimics native leptin, helps improve metabolic parameters. It must be used as an adjunct to diet, the fundamental treatment for lipodystrophy. It is only available through the Myalept REMS program.

Myalept (metreleptin) will be considered for coverage when the following criteria are met:

Lipodystrophy

For **initial** authorization:

1. Member has a diagnosis of congenital or acquired generalized lipodystrophy (CGL or AGL); AND
2. Member does not have any of the following:
 - a) HIV-associated lipodystrophy;
 - b) General obesity (without leptin deficiency).
3. **Dosage allowed/Quantity limit:** See package insert for adult and pediatric dosing charts. Max 10mg/day (2mL).

If all the above requirements are met, the medication will be approved for 6 months.

For **reauthorization**:

1. Initial criteria must be met, including continued diet management; AND
2. Chart notes must demonstrate improved signs and symptoms of leptin deficiency, such as reductions in HbA1c, fasting glucose, or triglycerides.

If all the above requirements are met, the medication will be approved for an additional 12 months.

CareSource considers Myalept (metreleptin) not medically necessary for the treatment of conditions that are not listed in this document. For any other indication, please refer to the Off-Label policy.

DATE	ACTION/DESCRIPTION
01/08/2021	New policy for Myalept created.
12/21/2021	Removed prescriber requirement, metabolic abnormality requirement, and dietary /lifestyle modifications requirement.
