Re: Service Plan letters

Effective 6/22/2017, all MyCare Waiver members received a letter when their service plan was updated. A copy of this letter was also be sent to the member's primary care physician and waiver providers received a service approval letter to ensure they have the most up to date information on the services being provided.

During this initial transition, you may have received multiple letters, however, this will decrease to only new/updated services.
