

Notification Date: August 24, 2017
To: HHW and HIP Health Partners
From: CareSource
Subject: Zip Codes and Taxonomy Codes on Claim Submissions

To ensure timely claims submission and processing, CareSource reminds you that when submitting claims, health partners must use the full nine-digit ZIP code for the service location and an appropriate taxonomy code.

For health partners who have multiple Indiana Health Coverage Programs (IHCP) Legacy Provider Identifiers (LPIs) with the same National Provider Number (NPI), the IHCP must establish a one-to-one relationship between the health partner's NPI and the LPI/service location. The full nine-digit ZIP code and taxonomy code are often required to establish a proper match.

For more information about claims submission processes, please refer to the [Health Partner Manual](#).
